Proof Report

Conditions of Approval:

1. 220 The reservoir established by the storage of water under water right 36-17370 and Rights 36-16982, 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 shall not exceed a total capacity of 143.0 acre-feet or a total surface area of 18.9 acres.
2. 219 Rights 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 authorize the diversion of an annual total of 187.6 acre-feet to be used for recreation and aesthetic storage for the initial (annual) filling of the reservoir and for the replacement of losses caused by evaporation from the reservoir authorized under right 36-16982. The 945 acre-feet of recreation and aesthetic storage use described by right 36-16982 accounts for the annual seepage losses associated with the reservoir. In combination, right 36-16982 and Rights 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 allow for a combined annual total recreation and aesthetic storage volume of 1,132.6 acre-feet (enough to fill the reservoir once, and to keep the reservoir full by making up annual losses associated with seepage and evaporation). The 1,292.0 acre-feet of irrigation storage described by water right 36-17370 accounts for the volume of water that may be diverted into the reservoir and rediverted for irrigation use throughout the season as reservoir levels fluctuate. In combination, water right 36-17370 and Rights 36-16982, 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 allow for a combined annual total storage volume of 2,424.6 acre-feet for all uses.
3. 18B The impoundment of water under this right is contingent upon the issuance of a certificate of approval per the dam safety provisions of Idaho Code and subsequent written authorization by the dam safety program administered by the Department.
4. 176 The waste water diverted under this right is subject to the right of the original appropriator, in good faith and in compliance with state laws governing changes in use and/or expansion of water rights, to cease wasting water, to change the place of use or manner of wasting it, or to recapture it.
5. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 130.
6. Upon specific notification, the right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.
7. 933 This right is for the use of trust water, and it is subject to review 20 years after its initial approval (date of permit approval) to re-evaluate the availability of trust water for the authorized use and to re-evaluate the public interest criteria for reallocating trust water.
8. 935 Administration of this right to satisfy the minimum stream flow water rights in the Snake River at Murphy Gage shall not be required because use of water pursuant to this right is either non-consumptive or the right holder is required to provide ongoing mitigation to offset the depletion of water resulting from the use of this right.

Conditions of Approval:

1. X27 This right is limited to the irrigation of 323 acres within the authorized place of use in a single irrigation season.
2. X35 This right (36-16982) and Rights 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, 36-16961 when combined shall not exceed the irrigation of 323.0 acres.
3. 206 This right (36-16982) and Rights 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 are limited to the irrigation of a specific 323.0 acres within the 476.0 acre place of use authorized by these rights in a single irrigation season. The specific 323.0 acres to be irrigated by the right holder are shown in the electronic shape file associated with these rights in the geographic information system component of the water rights database maintained by the department. Before changing the 323.0 acres to be irrigated within the 476.0 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.
4. 220 The reservoir established by the storage of water under this right (36-16982) and Rights 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 shall not exceed a total capacity of 143.0 acre-feet or a total surface area of 18.9 acres.
5. 219 Rights 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 authorize the diversion of an annual total of 187.6 acre-feet to be used for recreation and aesthetic storage for the initial (annual) filling of the reservoir and for the replacement of losses caused by evaporation from the reservoir authorized under this right (36-16982). The 945 acre-feet of recreation and aesthetic storage use described by this right (36-16982) accounts for the annual seepage losses associated with the reservoir. In combination, this right (36-16982) and Rights 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 allow for a combined annual total recreation and aesthetic storage volume of 1,132.6 acre-feet (enough to fill the reservoir once, and to keep the reservoir full by making up annual losses associated with seepage and evaporation). The 1,292.0 acre-feet of irrigation storage described by this right (36-16982) accounts for the volume of water that may be diverted into the reservoir and rediverted for irrigation use throughout the season as reservoir levels fluctuate. In combination, This right (36-16982) and Rights 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 allow for a combined annual total storage volume of 2,424.6 acre-feet for all uses.
6. 18B The impoundment of water under this right is contingent upon the issuance of a certificate of approval per the dam safety provisions of Idaho Code and subsequent written authorization by the dam safety program administered by the Department.
