I think generally yes, but they wanted to get these taken care of as they are the important ones.

Hi Candice~

Thanks for sending! We will review and get back to you as soon as possible. One question – are your clients okay moving forward with the recommendation of disallowed on 97-9810? Just want to know what's on the table for discussion.

Thanks,
-Lacey-

I was able to meet with my client – we had a few issues with sickness, out of office and then the crazy snowstorm in Colorado that took out their electricity!

In any event, this is what we think the SF5s should look like. There simply aren't shared points of diversion for these water rights even though they are within the same stream or in the same QQ. And, I think there was a thought that someone this is a subdivision developing one water "system" which is not true.

There are portable pipes stored in the sheds that are placed in the streams when the property is visited and used by my clients.

Let me know what questions you have and whether these would be acceptable. Or, if we need to supply more information or declarations/evidence from my clients.

Hi Candice~

Yes, that's right. Please see attached draft recommendations to share with your clients for potential settlement.

Thanks,
-Lacey-

Yes. Also, I think we left it that you would send draft SF5s along the lines that we discussed. Am I remembering correctly?

Hi Candice~

I think you mean these pictures of the structures and not screen grabs of the maps we looked at during the initial hearing? If so, this document is in the backfile on IDWR's [water right research tool](#), and I've attached it here for your convenience. Hope it helps!

Thanks,
-Lacey-

Lacey,

Would you send me the pictures of the different cabins for the Hawley claims?

It would be useful when talking with my clients.
