Ramshorn Grazing Assn POU Adjustment.pdf;

Hi Nolon,

Attached is a map depicting the place of use adjustments associated with the mini pivot in the SWNW of Sec. 21, 06N, 26E. Because the total number of acres proposed to be irrigated in the SWNW will not change, a transfer application is not required. However, to update the 25.5-acre place of use boundary in the SWNW, the Department will need a signed letter that describes the requested boundary modification. To assist you in preparing that letter you may use the following narrative:

Recently, a buried pipeline was installed to replace the Burnett Ditch. A section of the Burnett Ditch that previously crossed my property in the SWNW of Sec 21, 06N, 26E, has been removed, allowing me the ability to irrigate a small portion of land east of the former ditch. The current place of use boundary for water rights 34-119B, 34-213A, 34-215, 34-223A, 34-225, 34-227A, 34-10540, and 34-10541 includes 25.5 acres in the SWNW of Sec. 21, 06N, 26E.

Attached is a map depicting in purple the 25.5 acres in the SWNW that I proposed to irrigate. Please update the place of use boundary for these water rights to reflect to the proposed changes shown on the map.

Sincerely

Ramshorn Grazing Assn.

Please sign the letter and return it, along with the map, to me.

Thanks,
Blake
