N/A						

2. Measurement Comments: No measurement is required for permits qualifying for an in-office examination according to the IDAPA Beneficial Use Examination Rules.

E. FLOW CALCULATIONS

 Additional Computation Sheets Attached

Measured Method: The permit authorized domestic use for two homes. However, the permit holder indicated on their Proof Statement and 2025 NAIP Aerial Imagery confirmed domestic use for only one home was developed. According to Administrative Application Processing Memo #22 the standard diversion rate for a single domestic use is 0.04 cfs. I am recommending a 0.04 cfs diversion rate.

Administrative Application Processing Memo #22 Standard = 0.04 cfs

Permit allowed = 0.06 cfs

Total Recommendation = 0.04 cfsComments: N/A

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = \underline{N/A}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = \underline{N/A}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = \underline{N/A}$$

2. Volume Calculations for Other Uses: According to 2025 NAIP Aerial Imagery internal and external domestic use was developed. Administrative Application Processing Memo #22 the standard diversion volume for a single domestic use is 0.6 for internal and 0.6 for external use or 1.2 af. I am recommending a 1.2 af diversion volume.

Administrative Application Processing Memo #22 Diversion Volume Standard = 1.2 af

Total Recommendation = 1.2 afComments: N/A

G. PURPOSE OF USEIrrigation Y X N # Stock N/A Domestic # of Homes 1 (internal and external)Change in Purpose of Use? Y X NMethod of Determination: GIS, Idaho Tax Parcel Data, 2025 NAIP Aerial Imagery, and the permit holders Proof Statement.**H. NARRATIVE/REMARKS/COMMENTS**

This permit qualifies for an in-office licensing examination. The permit authorized internal and external domestic use for two homes diverting from an unnamed spring tributary to Hurdy Creek. The applicant indicated on their Proof Statement and 2025 NAIP Aerial Imagery confirmed internal and external domestic use for one home was developed within the development period. A condition on the permit requires the permit holder to install a lockable device allowing suitable control of diversion by the watermaster. The permit holder did not indicate a lockable device was installed on the diversion system on their Proof Statement. However, after speaking with the permit holder on June 11th, 2026, they indicated the diversion system would allow suitable control of diversion by the watermaster. The standards set in Administrative Application Processing Memo #22 were utilized to make a diversion rate and volume recommendation. All conditions of permit approval have been met, and development of beneficial use was confirmed within authorization on the permit. Therefore, I am recommending a 0.04 cfs diversion rate and 1.2 af diversion volume.

Conditions R05 and 01R should remain on the license. Condition X04 should be changed to X01 since only one home was developed. Condition 01H should be changed to R02 as is standard with licensing. Condition 187 should be added to the license since external domestic use development was confirmed. Condition 121 should be changed to 103 as is standard with licensing.

Have conditions of permit approval been met? X Yes No**I. RECOMMENDATIONS**

1. Recommended Amounts:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>DIVERSION RATE</u>	<u>ANNUAL VOLUME</u>
Domestic	01/01-12/31	0.04 CFS	1.2 AF
	<u>Totals:</u>	0.04 CFS	1.2 AF

2. Recommended Amendments:
