SUBJECT: Bear River Basin Adjudication Claim No. 11-4083

Dear Claimant,

The Idaho Department of Water Resources is reviewing your claim for recommendation. These items need to be addressed before we can proceed:

1. **Diversion Works Description:** Please provide a thorough description of the diversion works and a map depicting the delivery system from the point of diversion to the place of use. The description shall include all major components of the water delivery system, such as dams, reservoirs, ditches, pipelines, pumps, wells, headgates, etc. The description shall also include those dimensions of major components which affect the diversion capacity of the water delivery system. The description shall also state whether the ditches are lined and/or covered, the depth of wells, the horsepower capacity of pumps, and whether headgates are automatic or equipped with locks and/or measuring devices.
2. **Field Examination:** Once the above information has been received, an agent will schedule an in-person field exam to confirm the details of the claim.

Please make contact if you would like to discuss this. Our contact information can be found in the header of this letter. If we do not hear from you or receive additional evidence, your claim will be recommended with the information currently provided. In certain scenarios, it may be beneficial to hire a consultant or attorney to assist you in your research.

Enclosure: Copy of claim 11-4083
