Counsel for Applicant Veolia Water Idaho, Inc.

BEFORE THE DEPARTMENT OF WATER RESOURCES OF
THE STATE OF IDAHO

IN THE MATTER OF APPLICATION FOR
TRANSFER NO. 90071 IN THE NAME OF
VEOLIA WATER IDAHO, INC.

STIPULATION AND JOINT MOTION
TO APPROVE TRANSFER

Applicant Veolia Water Idaho, Inc. ("Veolia") and Protestant Edwards Family LLC ("Edwards"), by and through their undersigned counsel of record (together, the "Parties"), pursuant to IDAPA 37.01.01.203, .220, .556, and .612, hereby stipulate and move the Idaho Department of Water Resources ("Department") to approve the above-referenced transfer application ("*Application*") according to the terms and conditions set forth in this *Stipulation and Joint Motion to Approve Transfer* ("*Stipulation*").

The Parties hereby stipulate and agree that any approval of the *Application* shall include the following conditions on each water right:

Some points of diversion identified in this right are located within the boundaries of the Boise Front Low Temperature Geothermal Resource Groundwater Management Area. The well driller shall monitor water temperatures while drilling any new or replacement well under this right within the Boise Front Low Temperature Geothermal Resource Groundwater Management Area. If water with a temperature greater than 85 degrees Fahrenheit is encountered by the driller when drilling such a well, drilling must immediately cease, and the Department must be notified. Drilling such a well shall not resume until the Department has

reviewed the drilling conditions, and established standards for construction with the driller.

Diversion and use of water with a temperature greater than 85 degrees Fahrenheit is not authorized under this right.

These conditions are consistent with the Department's approvals of transfer applications in the IMAP proceeding (Transfer No. 89499). For reference, an example of one transfer approval in the IMAP proceeding is included in Attachment A (water right no. 63-4395). The conditions listed above are numbered 7 and 8 in Attachment A.

In addition, any approval of the *Application* must include the Department's "APOD" (*i.e.*, alternate points of diversion) condition on each water right. An example of the APOD condition is condition no. 11 in Attachment A. The APOD condition describes the dates at which various points of diversion were added to the water right, such as in the original license and in a partial decree or subsequent transfer. Attachment B to this Stipulation contains lists of points of diversion and their locations to include in the APOD condition for each water right subject to the *Application*.

The Parties move the Department, pursuant to IDAPA 37.01.01.220 and .612, for an order approving the *Application* and including the *Conditions* on each water right subject to the *Application*. Edwards' protest to the *Application* shall be deemed withdrawn with prejudice upon the issuance of such an order.

Each party shall bear its own costs, expenses, and attorney fees in connection with the above-captioned matter.

ATTACHMENT A
Example of IMAP transfer approval

WATER RIGHT NO. 63-4395
As Modified by AMENDED Transfer No. 89499

In accordance with the approval of Transfer No. 89499, Water Right No. 63-4395 is now described as follows

Right Holder: VEOLIA WATER IDAHO INC
8248 W VICTORY RD
BOISE, ID 83709-4165

Priority Date: 6/1/1950

Source: GROUND WATER

<u>BENEFICIAL USE</u>	<u>FROM</u>	<u>TO</u>	<u>DIVERSION RATE</u>
MUNICIPAL	01/01 to 12/31		0.33 cfs
			0.33 cfs

LOCATION OF POINT(S) OF DIVERSION

Points of diversion authorized by this water right are described in Attachment A of this approval document.

CONDITIONS OF APPROVAL

- 1 This right authorizes 0.33 cfs for reasonably anticipated future needs for a planning horizon that ends on December 31, 2065, within the service area pursuant to Chapter 2, Title 42, Idaho Code.
- 2 A map generally depicting the service area for this water right at the time of the approval of Transfer 89499 is attached to this document for illustrative purposes.
- 3 Place of use is within the service area of Veolia Water Idaho, Inc. as provided for under Idaho law. The place of use is generally described as within the city limits of Boise and the surrounding service area.
- 4 That portion of this right authorized for reasonably anticipated future needs shall not be changed to a place of use outside the service area as defined in Idaho Code § 42-202B or to a new purpose of use.
- 5 Prior to diversion and use of water under Transfer approval 89499, the right holder shall install and maintain acceptable measuring device(s) at the authorized point(s) of diversion, in accordance with Department specifications.
- 6 The right holder shall record the diversion volume measurements and maximum flow rates for each point of diversion monthly throughout the planning horizon. The measurement records must be made available to the Department upon request. Within 90 days of December 31, 2035, December 31, 2045, December 31, 2055, and upon the expiration of the planning horizon, the right holder shall prepare a report containing the measurement records and a gap analysis comparing peak demand with the right holder's portfolio of water rights and other entitlements available to meet that demand. The right holder shall submit the report to IDWR with notice provided by the right holder to the parties to Transfer 89499.
- 7 Some points of diversion identified in this right are located within the boundaries of the Boise Front Low Temperature Geothermal Resource Groundwater Management Area. The well driller shall monitor water temperatures while drilling any new or replacement well under this right within the Boise Front Low Temperature Geothermal Resource Groundwater Management Area. If water with a temperature greater than 85 degrees Fahrenheit is encountered by the driller when drilling such a well, drilling must immediately cease, and the Department must be notified. Drilling such a well shall not resume until the Department has reviewed the drilling conditions, and established standards for construction with the driller.

WATER RIGHT NO. 63-4395
As Modified by AMENDED Transfer No. 89499

- 8 Diversion and use of water with a temperature greater than 85 degrees Fahrenheit is not authorized under this right.
- 9 Point of diversion located within SESW, S05, T04N, R01E is known as Floating Feather Well. Point of diversion located within SWNW, S07, T04N, R01E is known as Redwood Creek Well #1. The right holder shall measure its diversions from the Floating Feather well and report water diverted and water levels measured to the Department upon request.
- 10 The water bearing zone for points of diversion located within SESW, S05, T04N, R01E and SWNW, S07, T04N, R01E is below 183 feet. The water bearing zone for the points of diversion located within SWNW, S28, T03N, R03E and SENE, S29, T03N, R03E is below 80 feet. The water bearing zone for the points of diversion located within NESW, S23, T04N, R01W and SWSE, S24, T04N, R01W is below 233 feet.
- 11 To the extent necessary for administration between points of diversion for ground water, and between points of diversion for ground water and hydraulically connected surface sources, ground water was first diverted under this right from

- The Durham well located in T03N R03E Sec 29 SENE

The partial decree dated May 05, 2010 authorized the following additional wells as points of diversion under this right

- The Licorice well located in T03N R03E Sec 28 SWNW

Transfer 89499 authorized the following additional wells as points of diversion under this right

- 12 The approval of Transfer 89499 redefines all of the elements of this water right, and the new use of water authorized by this approval shall constitute the full extent of the right.
- 13 The diversion and use of water described in Transfer 89499 may be subject to additional conditions and limitations agreed to by the participants in the IMAP contested case proceeding pursuant to separate agreements to which the Department is not a party. Because the Department is not a party to those agreements, the Department is not responsible for enforcement of any aspect of the agreements not specifically addressed in conditions herein. Enforcement of those agreements shall be the responsibility of the parties to the agreements. Such agreements may include, but are not limited to, IMAP Settlement Agreement Between Boise Project et al. and SUEZ (executed July 9, 2018) and the Stipulation for Withdrawal of Protests and Request to Change Status to Intervenor by Nampa & Meridian Irrigation District and Settlers Irrigation District (dated April 18, 2018).
- 14 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
- 15 Pursuant to Idaho Code § 42-1412(6), this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.
- 16 This right does not grant any right-of-way or easement across the land of another.
