6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

Applicant Name: Andrea M Chatalas, Trustee of the Taylor Sun Valley Revocable Residential Trust

Is this application being submitted with a lease application as a lease/rental package?

Yes ☐ No ☒

If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below and printed single sided. This checklist is part of the rental application and must be included with the rental application. **Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.**

There is no filing fee for submitting a rental application. The annual rental fee due will be calculated based on the volume of water required under an approved rental agreement. **Timing:** Rental application processing is prioritized between November through March. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests cannot provide retroactive approval, and applications will not be accepted once the rental season of use period has concluded. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicant.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. *Rental applications that require modeling must also complete the table below for the specific water rights to be rented. If no, continue to Question 4B.*

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers. Include any additional water required to meet area headgate requirements, minimum flow rates when combined with existing water rights at the rental location, or mitigation requirements because of [ESPA Modeling Analysis](#) results. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Active leases and rentals are searchable via the [Lease and Rental Map Search](#) tool. Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.**

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request

Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.03	6.0	1.7
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A.

C. Does your rental request propose to change the nature of use for any water right(s) requested above?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. MEMORANDUM FOR AGREEMENT NO. 1029

To: Water Right(s) 37-159B

From: Catalina Beck Water Resource Agent

Date: June 11, 2026

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: This is a renewal rental application for the irrigation of 1.7 acres from groundwater, received on December 17, 2025, for a five-year rental period beginning in 2026. However, the water right available to satisfy this rental request is only available for a one-year term beginning in 2026. The proposed rental will obtain water from water right 37-159B. The rental point of diversion is located within the Big Wood River Management Area, Trust Water Area, and the Galena Ground Water District.

AUTHORITY TO FILE: The rental application was signed by Andrea Chatalas, who is listed as the trustee for Taylor Sun Valley Revocable Residential Trust. The proposed place of use and the point of diversion for the rental are listed under the Talor Sun Valley Revocable Residential Trust, with Andrea Chatalas as trustee. There are no concerns for authority to file.

INJURY TO OTHER WATER RIGHTS: The backfile for water right 37-159B identifies the East Fork Big Wood River as the original source of water, although the current authorized point of diversion is groundwater. A transfer application in the backfile proposed changing the point of diversion to a hydraulically connected groundwater source. This change is reflected in the partial decree, which includes a condition limiting groundwater diversion to periods when water is available and in priority from the East Fork Big Wood River.

The proposed rental is not expected to adversely affect river conditions because the groundwater source is hydraulically connected to the surface water system. Consistent with the condition contained in the partial decree, the rental should include a condition requiring that groundwater diversion occur only when water is available from the Big Wood River system and is in priority with the East Fork Big Wood River.

ENLARGEMENT OF USE: There are no irrigation water rights authorized for the proposed place of use. The water right authorizes irrigation at a rate of 0.02 cfs and a duty of 3.5 acre-feet per acre, which is the same rate and duty requested under the rental application. There are no concerns with enlargement.

LOCAL PUBLIC INTEREST: The proposed rental of water is in the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The proposed rental is consistent with the conservation of water resources in Idaho.

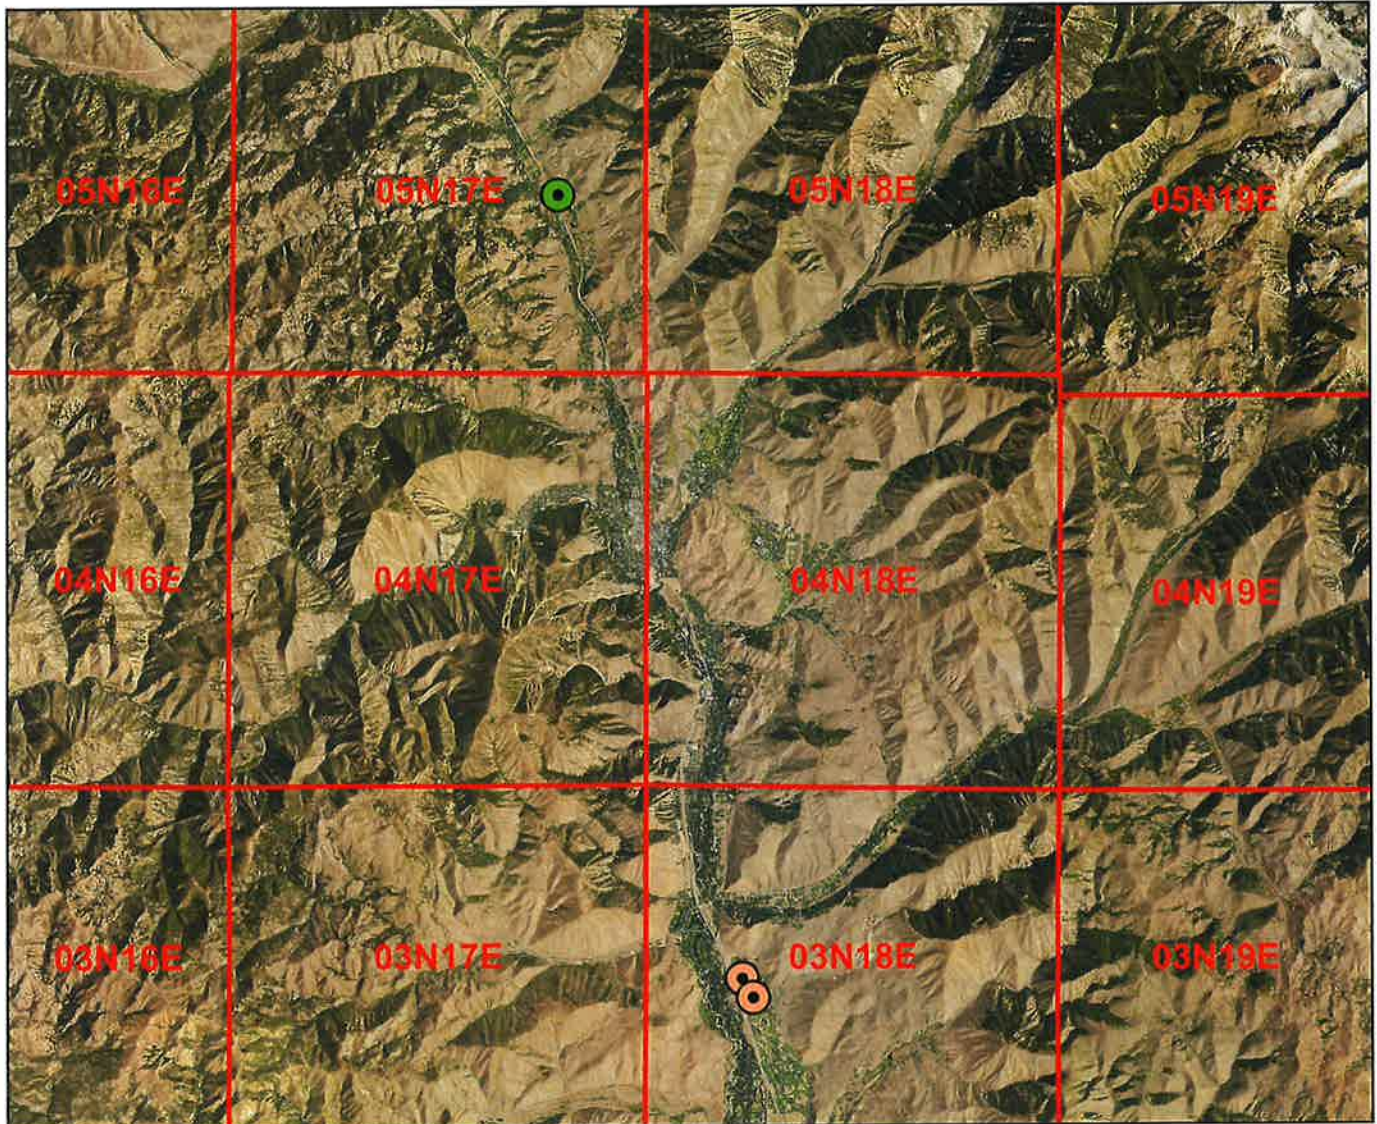

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The proposed POD is within the administrative area of IDWR's Southern Region and Water District No. 37. Comments regarding the proposed rental were requested from the regional manager and Watermaster on June 11, 2026. No concerns were received.
