RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
10. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.
11. Diversion of groundwater is limited to those times water is available for diversion under this right and priority from the Big Wood River.

WATER SUPPLY BANK RENTAL AGREEMENT No. 1020

12. This rental agreement does not authorize the construction of a well.
13. Prior to December 31 of each year, the Board may review this rental agreement to determine whether it is consistent with the management plan that may be approved for the Big Wood River Ground Water Management Area (BWRGWMA). The Board may cancel this rental agreement if the Board determines it is not consistent with the BWRGWMA plan. If this rental agreement is canceled, the cancellation shall not take effect until December 31 of the year in which the rental agreement is canceled.

APPLICATION TO RENT WATER
FROM THE BOARD'S WATER SUPPLY BANK

DEPT. OF WATER RESOURCES

Applicant Name: The Otis Booth Residence Trust c/o Lynn Booth; Co-Trustee

Is this application being submitted with a lease application as a lease/rental package?

Yes ☒ No ☐

If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below and printed single sided. This checklist is part of the rental application and must be included with the rental application. **Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.**

There is no filing fee for submitting a rental application. The annual rental fee due will be calculated based on the volume of water required under an approved rental agreement. **Timing:** Rental application processing is prioritized between November through March. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests cannot provide retroactive approval, and applications will not be accepted once the rental season of use period has concluded. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicant.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit <https://idwr.idaho.gov/iwrb/programs/water-supply-bank/resources/>

2. MAP

Attach a map. Create a map of the proposed point(s) of diversion, place(s) of use and water diversion, delivery and distribution systems. The map must include the rental place of use outlined and annotated with legal land descriptions (Township, Range, Section and Quarter- Quarters) or with GPS coordinates. For irrigation purposes, mark the number of acres to irrigate per 40-acre tract (1/4-1/4). Attach the map to this application and label it **Attachment 2**.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

- A. Describe why you desire to rent water and provide a detailed description of your proposed use. If the proposed use is not for irrigation, describe in detail how you determined the amount of rental water required. If the space below is insufficient, attach additional sheets as required and label them **Attachment 3A**:

Proposed 5 year rental is for irrigation use under 37-7059 at applicant's property.

- B. Enter the desired and/or minimum rates of flow, volume, or irrigable acres requested for your rental purposes:

Desired Rate (Cubic Feet/Second)	Desired Volume (Acre-Foot)	Minimum Rate* (Cubic Feet/Second)	Minimum Volume* (Acre-Foot)	Desired Acres (if applicable)
0.11 CFS	19.3 AF	0.11 CFS	19.3 AF	14.8 (*5.3 actual) AC

* Sometimes water rights provide an exceptionally low rate per acre and/or low volume per acre. This section is meant to establish an acceptable range of water sufficient for your proposed water use. Please see question 4B and complete if necessary.

- C. This section must be completed in full. The desired start date must be later than the date received by the Department. The latest possible start is the latest possible date you could begin diverting water to put the rental to beneficial use in the desired start year. If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

Has documented consent from all relevant water delivery entities been obtained?

Yes ☐ N/A ☒

If yes, include documented consent as **Attachment 3F**.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. *Rental applications that require modeling must also complete the table below for the specific water rights to be rented. If no, continue to Question 4B.*

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers. Include any additional water required to meet area headgate requirements, minimum flow rates when combined with existing water rights at the rental location, or mitigation requirements because of [ESPA Modeling Analysis](#) results. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Active leases and rentals are searchable via the [Lease and Rental Map Search](#) tool. Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
37-7059	Irrigation	0.11	19.3	14.8		0.11	19.3	14.8
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.11	19.3	14.8
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

Applicant seeks to rent 14.8 acres of 37-7059 for 5.3 acres of actual irrigation Low div. rate (37-7059) requires rental of additional acres in order to apply water at a rate of 0.02 cfs per acre.

C. Does your rental request propose to change the nature of use for any water right(s) requested above?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S).37-7059 AGREEMENT 1022**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$ 636.90 **per year** was calculated based on the current rental rate of \$33.00 per acre-foot times a diversion volume of 19.3 acre-feet. The annual rental fee for 2027 is due by December 31, 2026. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check in the amount of \$639.90 for 2026 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing.

Pursuant to the Water Supply Bank Rules, 90% or \$573.21 of the rental fee will be paid to the lessor(s) and 10% or \$63.69 will be retained by the Department to offset administrative costs for **2026**.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

MEMORANDUM FOR AGREEMENT NO. 1020

To: Water Right(s) 37-7059
From: Catalina Beck Water Resource Agent
Date: May 19, 2026
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: The renewal rental application for 19.3 acre-feet (AF) of water for irrigation was received on February 23, 2026, requesting a five year starting in 2026. Rental application 3457 is a lease rental package with lease application 3472 (water right 37-7059).

AUTHORITY TO FILE: The application was signed by Lynn A Booth. Review of parcel information from Blaine County shows the proposed place of use is owned by Lynn Booth and Loren Booth who are the co-owners of Otis Booth Residence Trust. No concerns regarding authority.

INJURY TO OTHER WATER RIGHTS: The rental applicant and the lessor divert groundwater from the same hydrologic basin and the same aquifer zone. Therefore, no injury to other water rights is likely as a result of moving the groundwater lease diversion under this rental.

ENLARGEMENT OF USE: There are rights at overlap at the place of use that overlap the proposed rental POU, however they are for recreation use. No combined limit conditions are needed for the rental.

The standard lease rate and volume requirement is 0.007 cfs and 1.31 af per acre; however, because the applicant is requesting a volume greater than the standard rate and volume allowance, additional acres must be rented to accommodate the requested volume.

LOCAL PUBLIC INTEREST: The proposed rental of water is in the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The proposed rental is consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The proposed POD is within the administrative area of IDWR's Southern Region and Water District No. 37. Comments regarding the proposed rental were requested from the regional manager and Watermaster on June 16, 2026. No concerns were received.
