Dear Bob,

Thank you for helping us through the Bear River adjudication process. This letter is to confirm that the three springs on our property have all been used for stock water since the land was homesteaded. Stockwater claim 11-4242 is one of those springs. Sometime ago this spring was fenced and improved to capture the spring water and protect it from livestock contamination. The spring water was diverted to a livestock trough which overflows into the existing stream that the cattle used to drink from. Nothing has changed in regard to the use of the spring water.

If there is any other information that we need to provide please let us know.

Take care,

Rex and Dee Johnson
