2. Measurement Comments: No measurement is required for permits qualifying for an in-office examination according to the IDAPA Beneficial Use Examination Rules.

## E. FLOW CALCULATIONS

     Additional Computation Sheets AttachedMeasured Method: According to Administrative Application Processing Memo #22 the standard diversion rate for a single domestic use is 0.04 cfs. I am recommending a 0.04 cfs diversion rate.

Administrative Application Processing Memo #22 Standard = 0.04 cfs

Permit allowed = 0.04 cfs

**Total Recommendation = 0.04 cfs**Comments: N/A

## F. VOLUME CALCULATIONS

## 1. Volume Calculations for Irrigation:

V = (Acres Irrigated) x (Irrigation Requirement) = N/A  
I.R.V = [Diversion Rate (cfs)] x (Days in Irrigation season) x 1.9835 = N/A  
D.R.V = Smaller of V<sub>I.R.</sub> and V<sub>D.R.</sub> = N/A2. Volume Calculations for Other Uses: 2026 Bonner County and 2025 NAIP Aerial Imagery confirmed the development of internal and external domestic use for 1 home. According to Administrative Application Processing Memo #22 the standard diversion volume for a single domestic use is 0.6 af for internal use and 0.6 af for external use or 1.2 af total. I am recommending a 1.2 af diversion volume.

Administrative Application Processing Memo #22 Standard = 1.2 af

**Total Recommendation = 1.2 af**Comments: N/A

**H. NARRATIVE/REMARKS/COMMENTS**

This permit qualifies for an in-office licensing examination. The permit authorized internal and external domestic use diverting from Priest Lake. According to Idaho Tax Parcel Data the property was developed in 2003. 2026 Bonner County and 2025 NAIP Aerial Imagery confirmed the development of internal and external domestic use within the development period. A condition on the permit required the permit holder to install a fish screen meeting the fish screening and passage requirements of the Idaho Dept. of Fish and Game. The permit holder confirmed a fish screen was installed on the diversion intake according to their Proof Statement. There are no other WR's overlapping the permitted POU or POD. The standards set in Administrative Application Processing Memo #22 were utilized to make a diversion rate and volume recommendation. All conditions of permit approval have been met, and the development of beneficial use was confirmed within authorization on the permit. Therefore, I am recommending a 0.04 cfs diversion rate and 1.2 af diversion volume.

Conditions X60, X01, 187, and 004 should remain on the license. Condition 029 should be removed because the permit holder confirmed the installation of a fish screen meeting the fish screening and passage requirements of the Idaho Dept. of Fish and Game.

Have conditions of permit approval been met? ☒ Yes ☐ No
