

Accomplished Transfer Evidence 11-2041B

1953 Mosaics By Basin

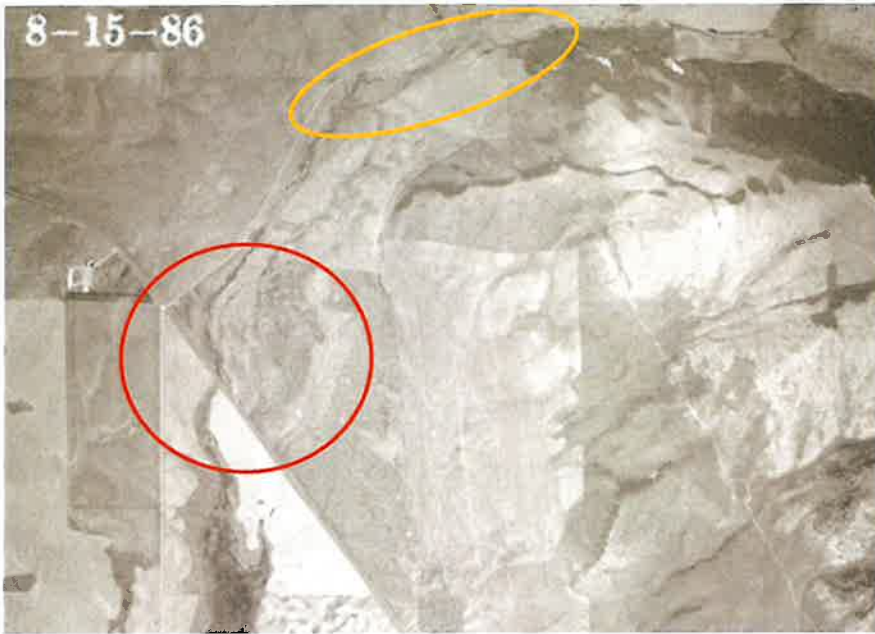

Imagery from the IDWR 1953 Mosaic layer shows the Licensed POU (red outline) and accomplished transferred POU location (gold outline). In 1953 there are clear channels visible throughout the licensed POU indicating active irrigation.

6-12-76

Imagery from USGS 1976 aerial imagery shows the Licensed POU (red outline) and accomplished transferred POU location (gold outline) shows no signs of beneficial use. This is supporting the claimant verbal statement during the office visit of the halting of use in 1975 due to the curtailing from the breaching of a dam upstream.

Accomplished Transfer Evidence 11-2041B

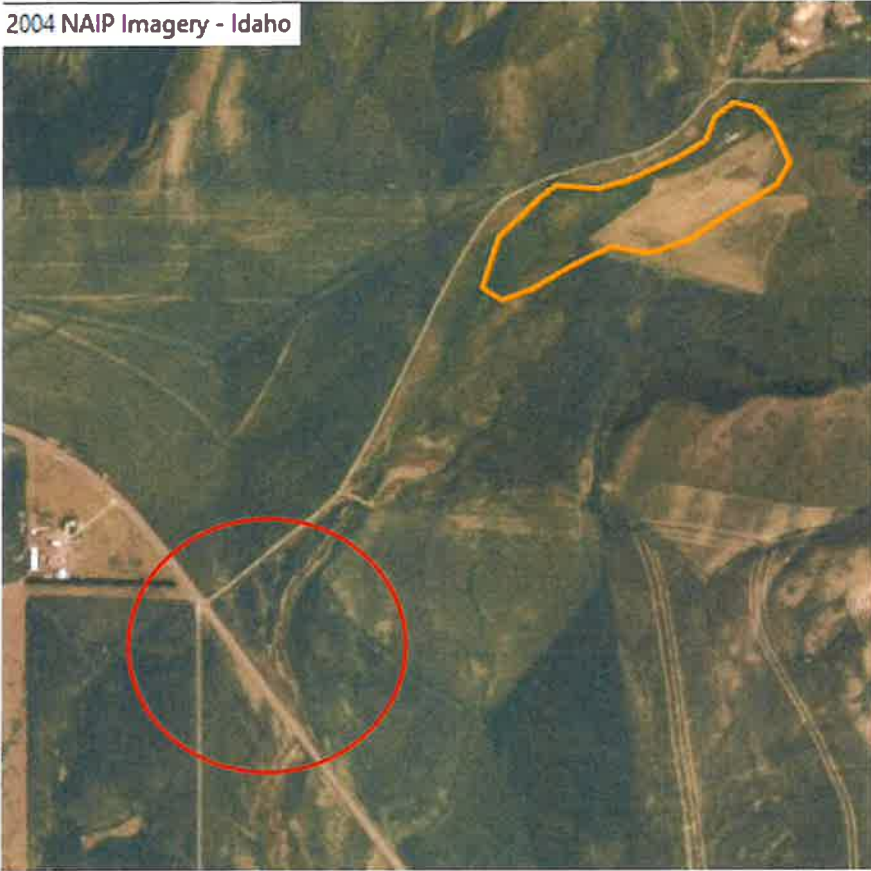

Imagery from USGS 1986 aerial imagery shows the Licensed POU (red outline) and accomplished transferred POU location (gold outline) continues to support the lack of use in the original POU area.

Imagery from USGS 1999 NAPP imagery shows the Licensed POU (red outline) and accomplished transferred POU location (gold outline) continues to support the lack of use in the original POU area and the continued development within the claimed transferred POU zone.

Accomplished Transfer Evidence 11-2041B

2004 NAIP Imagery - Idaho

Imagery from the IDWR 2024 NAIP layer continues to support the Licensed POU (Red outline) and the POU transferred POU location (Gold outline).
