Department of Water Resources

WATER SUPPLY BANK RENTAL AGREEMENT No. 1030

This is to certify that:

KENNETH CHAD PEARSON
2153 HIGHWAY 26
GOODING, ID 83330-5341

filed an application to rent water from the Water Supply Bank ("Bank"). The Idaho Water Resource Board ("Board"), being authorized to operate a Bank and to contract by and through the Director of the Idaho Department of Water Resources ("Director, Department") for rental of water from the Bank, agrees to rent water as follows:

Summary of Water Rights or Portions Rented from the Bank

Water Right No.	Priority Date	Source	Diversion Rate (CFS)	Diversion Volume (AF)	Acres (AC)
37-22205	7/21/1961	GROUND WATER	0.10	22.8	0.0
Rental Totals			0.10	22.8	0.0

Term of Rental: This rental agreement shall take effect when all parties have signed it and shall continue in effect until December 31, 2026. Use of rental water shall be authorized as of either the date this rental agreement takes effect or the first day of the rental season of use, in 2026, whichever occurs last.

Annual Rental Fee:

2026: \$752.40

The full fee for the rental of the above-described right(s) is \$752.40 for 2026. The rental fee includes an administrative fee of \$75.24 for 2026.

An annual payment shall be received by the Department on or before December 31 each year preceding the use of the rented water rights. The agreement will be void if payment is not received by the due date in a given year. Rental fees are non-refundable. To voluntarily terminate the agreement early, notify the Department in writing prior to the rental fee due date.

Total Water Use Authorized Under Rental Agreement

Beneficial Use	Diversion Rate (CFS)	Diversion Volume (AF)
COMMERCIAL	0.10	12.0
STOCKWATER	0.10	4.0
Combined Total	0.10	16.0

*** The authorized water usage reflects a reduction from the water right elements rented, to account for 6.8 AFA of mitigation.**

Detailed water right conditions are attached.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 1030

The undersigned renter agrees to use the water rented under this agreement in accordance with the Water Supply Bank rules and in compliance with the limitations and conditions of use described in this agreement:

RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 1030

9. This rental agreement does not authorize the construction of a well.
10. Commercial use under this rental agreement is for a dairy facility.
11. Use of water under this agreement may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 130.
12. The use of water under this rental agreement may be dependent on participation in an approved mitigation plan. In the event of a delivery call by senior surface water users, the rented rights may be curtailed and use under the rental agreement will not be allowed if mitigation is not provided.

APPLICATION TO RENT WATER FROM THE BOARD'S WATER SUPPLY BANK

Applicant Name: Kenneth Chad Pearson

Is this application being submitted with a lease application as a lease/rental package?
If yes, specify companion water rights in Section 4

Yes ☒ No ☐

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. **Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.**

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

1. CONTACT INFORMATION

A. Applicant Kenneth Chad Pearson

Mailing Address <u>2153 Highway 26</u>	Gooding	Idaho	83330
Street	City	State	Zip Code
Email Address <u>kenny.pearson@yahoo.com</u>	Phone Number <u>208-490-0975</u>		

B. Is this application being completed by an authorized representative on behalf of the applicant? Yes ☒ No ☐
 If yes, representatives (includes company employees if the applicant is a corporation, as well as legal counsel or consultants) should provide their information below if they desire to be included on correspondence with the rental applicant.

Representative Robert Ohlensehlen Professional Title Extension Professor Emeritus U of I

Organization O & H Associates Relationship to Applicant Consultant

Mailing Address 603 Woodland Drive Twin Falls, ID 83301

Email Address bob.ohlens@gmail.com Phone Number 208-539-1279

2. MAP

Create a map of the proposed point(s) of diversion, place(s) of use and water diversion, delivery and distribution systems. Make sure the rental place of use is outlined and annotated with legal land descriptions (Township, Range, Section and Quarter-Quarters) or with GPS coordinates. For irrigation purposes, mark the number of acres you desire to irrigate. Attach the map to this application and label it **Attachment 2**.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

A. Describe why you desire to rent water and provide a detailed description of your proposed use. If the proposed use is not for irrigation, describe in detail how you determined the amount of rental water required. If the space below is insufficient, attach additional sheets as required and label them **Attachment 3A**:

The applicant is doing an expansion of his dairy operation and additional water is being required to support the drinking water requirements of the additional animals and additional commercial water needed for the expanded facility.

B. Enter the desired and/or minimum rates of flow, volume, or irrigable acres requested for your rental purposes:

Desired Rate (Cubic Feet/Second)	Desired Volume (Acre-Foot)	Minimum Rate* (Cubic Feet/Second)	Minimum Volume* (Acre-Foot)	Desired Acres (if applicable)
.07 CFS	16 AF	.04 CFS	16 AF	0 AC

* Sometimes water rights provide an exceptionally low rate per acre and/or low volume per acre. This section is meant to establish an acceptable range of water sufficient for your proposed water use. Please see question 4B and complete if necessary.

C. This section must be completed in full. Enter the proposed start date and latest possible start date for using rental water as well as the number of years you would like to rent water. The latest possible start is the latest possible date by which you would be willing to pay for a rental and be able to benefit from utilizing rental water.

Desired Start Date (month/day/year)	Latest Possible Start Date (month/day/year)	*Mark Desired Rental Duration (Calendar Years)					**Applicant's preference if rental application cannot be processed prior to the latest possible start?	
January 1, 2026	February 1, 2026	☒ 1	☐ 2	☐ 3	☐ 4	☐ 5	☒ Process application as soon as possible	☐ Return application to applicant

* The number of years permissible for a rental is subject to the lease contract duration for the water right(s) being rented.

** Per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right. Water Supply Bank rental applicants are not authorized to utilize rental water prior to the execution of an approved rental agreement. Rental requests may be returned to applicants if no water is available from the Bank to fulfill a rental request.

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

- D. Describe your water distribution system and how rental water will be delivered from the point(s) of diversion (POD) to the proposed place of use (POU):

There are three wells on site that will be used for POD with well right 37-11200 being the primary points of diversion POU for 37-11200 is the three homes and the dairy operation (cattle drinking and barn commercial)

- E. Describe the physical type (pump, headgate, etc.) and location of the POD from which rental water is proposed to be diverted:

POD Description	Water Source	Other Water Rights Diverted from this POD
2 Wells 6S15ES10 SWNW	Groundwater	37-11200
1 Well 6S15ES10 SENW	Groundwater	37-11200

If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

- F. Has documented consent from all relevant water delivery entities been obtained? Yes ☐ N/A ☒
If yes, include documented consent as Attachment 3F.

- G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☐ No ☒
Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

- H. Has water modeling been provided with your rental request? Yes ☐ N/A ☒
If yes, label modeling Attachment 3 H.
Rental applications that require modeling will be returned if modeling is not provided.

- I. Specify the desired beneficial use of water and the requested season of use or number of acres required:

- ☐ Irrigation _____ (number of acres) Duration: Subject to IDWR standard seasons of use
- ☒ Commercial from: 1 / 1 (mm/dd) to: 12 / 31 (mm/dd)
- ☒ Stockwater from: 1 / 1 (mm/dd) to: 12 / 31 (mm/dd)
- ☐ Industrial from: _____ (mm/dd) to: _____ (mm/dd)
- ☐ Other: _____ from: _____ (mm/dd) to: _____ (mm/dd)

- J. For irrigation uses, do you propose to divert water at a rate greater than 0.02 cfs/acre? N/A ☒ Yes ☐ No ☐
If yes, justify the rate of flow and attach any supporting documents as Attachment 3J. Justification may include information on soil composition, conveyance losses, crop type, irrigation systems, public access areas, etc. A rate of 0.03 cfs/acre is permissible for irrigation of 5 acres or less.

NA

- K. Do you own the land at the proposed rental place of use (POU)? Yes ☒ No ☐
If no, attach documentation from the POU owner/operator confirming your authorization to use the POU and label it Attachment 3K.

- L. List all other water rights and sources of water at the rental place of use for the same purpose, including privately owned water rights and water received from a municipal supplier, an irrigation district, a canal company or any other water delivery entity. Explain why additional water is required:

37-11200 is the only right being used for the purpose of the livestock operation - the crop land is being irrigated under shares of Big Wood Canal Company

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
37-22205	Stockwater					.1	12	0
37-22205	Commercial					.1	4	0
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	.1	16	0
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

NA

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☒ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

The current right is listed as mitigation water use, the proposed use is for stockwater and commercial water use as necessary for a dairy operation. Additional water is needed to accommodate a small expansion of the dairy

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

5. ADDITIONAL INFORMATION

- A. Is this the first time that rental water is being requested for this purpose at the rental place of use? Yes ☒ No ☐
If no, list previous rental requests/agreements and explain why you have not secured a permanent water right for your needs:

- B. Have you or do you intend to submit an application for permit or transfer proposing a similar use as this rental? Yes ☒ No ☐
If yes, describe:

Yes there are three wells involved - one with right 37-11200 and two other residential wells that are unregistered.
All three wells are connected and capable of providing water to the dairy. A Transfer Application has been submitted to add two PODs and one POU to 37-11200 based on advice from IDWR - Twin Falls

- C. Was this rental application submitted in response to a Notice of Violation (NOV) or a pending NOV? Yes ☐ No ☒
If yes, describe the date and location of the NOV.

D. Additional Information

This rental application is being submitted to obtain the necessary additional water to allow the applicant to submit an application to expand his CAFO with Gooding County. He is proposing to increase his animal units from 498 to 777 which he can do based on additional land he has purchased. The rental will give him time to buy water.

DECLARATION

I hereby assert that the information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval. I understand that if this rental application is approved, it will be subject to the provisions of Section 42-1766, Idaho Code and all applicable state and federal laws. I understand that the submission of a rental application provides no guarantee for approval of a rental agreement. I also understand that, per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right and that I am not authorized to utilize water as proposed in this application prior to the execution of an approved rental agreement.

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL			
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

NA

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☒ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

Water nature of use will be converted from Irrigation to Stockwater / Commercial water for a dairy. The additional water is needed to address additional water needs due to request to expand the CAFO permit.

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

5. ADDITIONAL INFORMATION

- A. Is this the first time that rental water is being requested for this purpose at the rental place of use? Yes ☒ No ☐
If no, list previous rental requests/agreements and explain why you have not secured a permanent water right for your needs:

- B. Have you or do you intend to submit an application for permit or transfer proposing a similar use as this rental? Yes ☒ No ☐
If yes, describe:

There is a well located in 06S15E10SE10 but there are no recorded rights for the well even though it has been used for many years. This well is connected to the well associated with 37-11200 which is located in 6S15E10 SWNW -The Twin Falls office is working with the applicant to add the second POD to the 37-11200 right.

- C. Was this rental application submitted in response to a Notice of Violation (NOV) or a pending NOV? Yes ☐ No ☒
If yes, describe the date and location of the NOV.

- D. Additional Information

This rental agreement is being submitted to obtain the necessary additional water to allow the applicant to submit an application to expand the facility by adding animal units up to 777 Animal Units

DECLARATION

I hereby assert that the information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval. I understand that if this rental application is approved, it will be subject to the provisions of Section 42-1766, Idaho Code and all applicable state and federal laws. I understand that the submission of a rental application provides no guarantee for approval of a rental agreement. I also understand that, per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right and that I am not authorized to utilize water as proposed in this application prior to the execution of an approved rental agreement.

Water Modeling Requirement Information Sheet

Information on water modeling requirements for rental requests within special administrative areas

Important information on requesting rental water within special administrative areas: Refer to the information below to determine whether the modeling of potential impacts from your rental request is necessary. Use Section 4 of the rental application to identify selected water rights. **If you submit an application to rent water from within a special administrative area and water modeling is required, your rental request will be returned if water modeling is not provided.**

Water modeling may be required when an application to rent water involves one of two scenarios:

Scenario 1: The rental request proposes to divert water from a regulated water source and/or within a special administrative area AND the distance between the rental point(s) of diversion (POD) and the POD(s) for the leased water right(s) is greater than the administratively established, acceptable distance.

Regulated water sources may areas include:

- A. Ground water resources within the modeled area of the Eastern Snake Plain Aquifer (ESPA) and tributary aquifers;
- B. Ground water within Ground Water Management Areas (GWMAs) or Critical Ground Water Areas (CGWAs);
- C. Water resources within other specified administrative areas, as established by the Idaho Water Resource Board (IWRB) or the Idaho Department of Water Resources.

The distance between any rental POD(s) and the POD(s) for a leased water right to be rented is important. On the ESPA, distance is measured in terms of model cells that cover an area of one square mile. Ground water modeling is not required if lease POD(s) and rental POD(s) are located within the same model cell or within adjacent model cells. If the lease and rental PODs are separated by more than one model cell groundwater modeling must be completed using the IDWR ESPA Transfer Tool and modeling results must be submitted with the rental application. ESPA modeling tools can be accessed and freely downloaded from IDWR's website by visiting: www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.

Ground water modeling may be required within GWMAs, CGWAs or other regulated administrative areas. Applicants who desire to rent water within an established GWMA, CGWA or other regulated administrative area should consult IDWR's website before submitting their application to review the current status of administrative orders related to regulated administrative areas. Consult www.idwr.idaho.gov/WaterInformation/GroundWaterManagement/designated_areas.htm for information on GWMAs or CGWAs, visit <https://idwr.maps.arcgis.com/home/> to use mapping tools to find other regulated areas.

Applicants interested in renting water within a GWMA, CGWA or other regulated administrative areas should request water rights that have been leased into the Bank from within the same administrative area. Generally, the Bank will not permit a rental of water within a regulated administrative area if the leased water rights are not located within that same administrative area.

Scenario 2: A rental request proposes to divert water from a different but hydraulically connected water source.

Modeling situations may include:

- A. Rental requests that propose to divert surface water rights via ground water POD(s) (wells); and
- B. Rental requests that propose to divert ground water from one aquifer when the right being rented authorizes the diversion of ground water from a hydraulically connected, tributary aquifer.

Rental requests that propose to divert surface water rights from ground water points of diversion may be considered if ground water modeling establishes that the surface and ground water resources are directly and immediately hydraulically connected. An acceptable hydraulic connection occurs when at least 50 percent of the total depletions from a well are detectable from the original water source within a 24 hour period. The existing (leased) POD and proposed (rental) POD must be proximate such that diversion and use of water from the proposed POD would have substantially the same effect on the hydraulically-connected source as diversion and use of water from the original POD.

Requests to rent ground water across tributary aquifer sources may be considered if ground water modeling is provided to demonstrate that two aquifers are hydraulically connected and the anticipated impacts of diverting ground water from one source through the other is modeled accordingly.

For more information about rental application requirements, contact IDWR at (208) 287-4800.

**RE: RENTAL OF WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO. 37-22205, AGREEMENT 1030**

Dear Renter:

Please find enclosed a receipt in the amount of **\$752.40** and a copy of a fully executed Water Supply Bank Rental Agreement in connection with the rental of 22.8 acre-feet of water for commercial and stockwater use during 2026. Upon receipt of this fully executed agreement, you are authorized to divert water in compliance with the conditions of water use described in the agreement.

Pursuant to the Water Supply Bank Rules, 90% or \$677.16 of the rental fee will be paid to the lessor(s) and 10% or \$75.20 will be retained by the department to offset administrative costs for 2026.

If you have questions regarding this matter, please contact this office at bank@idwr.idaho.gov or 208-287-4800.

Sincerely,

Darin Vrem
Water Supply Bank

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S). 37-22205, AGREEMENT 1030**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$752.40 per year was calculated based on the current rental rate of \$33.00 per acre-foot times a diversion volume of 22.8 acre-feet.

Please send a check in the amount of \$752.40 for 2026 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing.

Pursuant to the Water Supply Bank Rules, 90% or \$677.16 of the rental fee will be paid to the lessor(s) and 10% or \$75.24 will be retained by the Department to offset administrative costs for **2026**.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

Sincerely,

Aaron Olson

MEMORANDUM FOR AGREEMENT # 1030

To: Water Right(s) 37-22168

From: Aaron Olson

Date: 6/12/2026

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

The Water Supply Bank (WSB) received rental application 3300 on October 14, 2025, on behalf of Kenneth Chad Pearson. The application requests a one-year rental with a volume of 16.0 acre-feet of water for commercial and stockwater use to cover the expansion of an existing commercial dairy. The application requests renting water right 37-2205 leased under contract 1507.

The proposed point of diversion and place of use are within the Snake River Basin Moratorium Area, North Snake Ground Water District, Eastern Snake Plain Aquifer Ground Water Management Area, the Trust Area, Water District 37 and 130.

AUTHORITY TO FILE:

The application was signed by the applicant Kenneth Chad Pearson. Gooding County parcel data shows that applicant is the owner of the proposed place of use. The applicant has authority to file the application.

INJURY TO OTHER WATER RIGHTS:

Both the leased right and proposed rental location are within the Eastern Snake Plain Aquifer modeling boundary. Since they are within the boundary, analysis of hydrologic effects within the aquifer and to the Snake River is required for processing. Modeling using the ESPA transfer tool ETRAN V3.4 was provided as an attachment to the application. Review of the ETRAN V3.4 modeling indicates that mitigation would be required to offset the impacts of the proposed water use at the rental location. The results of the mitigation check indicated no reach of the Snake River would not be impacted as a result of the rental. With a rental volume of 22.8 af (reduced to consumptive use vol of 16.0 af, see enlargement section) the results of modeling indicate that no depletions to reaches of the Snake River would occur as a result of the rental. There are no concerns of injury to other water rights.

ENLARGEMENT OF USE:

The nature of use of right 37-22205 will need to be changed from mitigation to commercial and stockwater use to satisfy the rental. The right has been leased to the bank since 2017, the USDA NASS Cropland Data Layer shows that the water right place of use consisted of alfalfa prior to the right being leased. ET Idaho data at the Picabo (PN-AM -- PICI) station shows the historical consumptive use of the irrigation to be 2.48 feet per acre per year when using the values for alfalfa – frequent cuttings. To cover the 16.0 af being requested in the application, an equivalent of 6.5 irrigated acres of right 37-22205 would need to be rented ($16.0 \text{ af} / 2.48 \text{ af/ac} = 6.45$). The leased amount of the right is for mitigation equivalent to 6.5 acres of irrigation, so the full amount of the lease will need to be rented. The rental overlaps with existing water right 37-11200 which is also owned by the applicant. Right 37-11200 has the same beneficial uses as the rental, the rental will simply provide additional rate and volume for stockwater and commercial use. There are no concerns with enlargement.

LOCAL PUBLIC INTEREST:

The proposed rental of water is in the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The proposed rental is consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The proposed POD is within the administrative area of IDWR's Southern Region and Water District No. 130. Comments regarding the proposed rental were requested from the regional manager and Watermaster on 6/12/2026. No concerns were received.

ESPA ANALYSIS RESULTS: SOU - 1/1 - 12/31

Attached is the application to lease/rent water from the water bank for Chad Pearson to enable him to do an expansion on his dairy operation. We have previously submitted an application, however, this application will supersede the previous application.

Izzy Crichton provided us a list of the water that is currently available for rent and the application we are submitting is for renting water from water right 37-22205 and lease number 1507.

If there are any questions, you can contact me at the telephone or email addresses listed below.

Thank you for your attention to this application.

Subject: RE: Missing ESPA Modeling

Good morning, Bob,

We do not know the availability of water for 2025 to 2030 at this time since no leases beginning in 2026 have been processed yet. Therefore, we cannot confirm that there is water available for rent for the 5 years your client is requesting. Our process for assessing water available for rentals beginning in 2026 will start on November 1st, 2025. You are welcome to check in on the availability of water for the rental on or after November 1st 2025.

Since we will not know the availability of water for rentals extending to 2030, we will hold your rental without the water modeling until November 1st. Then, when we can assess what's available, we can assign a water right to your rental and we will do the water modeling for you.

Best,
Izzy Crichton

Kris

If you could send me an email verifying that water is available and we are in the process of leasing water to meet the needs for the Confined Animal Feeding Operation expansion application we are submitting.

That would meet the requirements the county has. They could approve the application with the condition that proof is provided that the water lease is approved.

Thanks for your help.

Kris

We are in the process of applying for an expansion for the Pearson dairy. We are hoping to get the application in by the end of the first week of October. In the process it was discovered that the well that has been used on the dairy for several decades was never registered. Since there was a domestic well with some stockwater rights already on the property (Right 37-11200) but it was not located at the dairy where the existing dairy well was located we were told by the Twin Falls IDWR Office that we would need to lease water and once we have the water leased we will need to do some additional work to authorize a second point of diversion from the existing well associated with right 37-11200. This should bring us into full compliance. I have advised the owner that he should lease the water for at least five years which would give him time to purchase some water so that he owns rights for all that he needs.

Attached is the application and I have added the amount of the water needed so that he will be in compliance and I have included the water use plan for the dairy which justifies the amount of water he is requesting to lease.

I will be working with Bill Mills in the Twin Falls Office to complete the necessary application to make the Point of Diversion and any other adjustments necessary to get this water right situation in compliance.

Thanks for your assistance.

Good afternoon,

While reviewing your application, I noticed a couple of items that still need to be completed:

1. **ESPA Modeling Form** – Please fill out the ESPA Modeling form and mail it to our office. Currently, there isn't much availability in the ESPA. If you'd like, we can hold your application now, and you may resubmit it closer to **November 1st**, when more leases are processed and water modeling can be completed.

<https://idwr.idaho.gov/iwrb/programs/water-supply-bank/resources/> bottom of the page. Also have look at [ESPA Water Right Availability](#) on the right side of the page

2. **Question 3B** – This question must be answered before we can process your application, as it tells us how much water you are requesting.

Once we have these items, we'll be able to move forward.

Thank you,

-Kris Margheim
