- IDWR not sure how to tackle
- Not causing damage

Edwards Shut-in Records

- Odd/irregular periods for record keeping

Of note, water temperature

- Not monitored, need another year to determine temperature data

All people left at same time, State of ID Capitol Mall system – better data in 2027

Downhole temp monitor on

A couple of years to get more accurate temperature data

If the use increases, it could increase temperature

Questions on finding mystery, rogue user

Difficult to source

Significant, but not currently causing issues

Boise injection Well

Mike needs to check – Mike will get data to Heidi on the breakdown of time (spans?).

Repairs unknown

Totalized of all three wells

- Jon gives Mike (information?)

Big change in usage – Tiegs, etc.

Looks like a change, but might be a correction

Should settle and make more
