RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. Diversion of groundwater is limited to those times water is available for diversion under this right and priority from the East Fork of the Wood River.
10. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.

WATER SUPPLY BANK RENTAL AGREEMENT No. 1039

11. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
12. This right authorizes the diversion of ground water within the Big Wood River Ground Water Management Area (BWRGWMA). Use of water under this right shall be subject to the provisions of the BWRGWMA management plan approved by the director.
13. This rental agreement does not authorize the construction of a well.
14. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.

A. Are you requesting to rent specific water rights? Yes ☐ No ☑

If yes, specify below the elements of the water rights you are requesting to rent. **If no,** continue to Question 4B.

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

---

PURPOSE/NARRATIVE: Renewal rental application of previous rental agreement 570 was received on February 4, 2026, requesting to rent 1.2 acres, with a diversion rate of 0.02 cfs and a volume of 4.2 acre-feet (AF), for a five-year rental term. Due to limited water availability in the Ketchum area, the only water available for rental is from water right 37-159B, which can provide 0.80 acres, 2.8 AF, and a diversion rate of 0.02 cfs for the 2026 irrigation season. As a result, only a one-year rental can be approved. The representative, Zach Latham, was contacted via phone call regarding the reduced quantity of water and shortened rental term, and confirmed that the rental applicant is agreeable to the reduction and wishes to proceed with the rental based on the water available for 2026. The rental point of diversion (POD) is located within the Big Wood River Management Area, Trust Water Area, and the Galena Ground Water District.

AUTHORITY TO FILE: The rental application was signed by John Anderson, co-owner of JSA Trust. The associated point of diversion (POD) and place of use (POU) are in the name of John Anderson. Based on the information provided, there are no concerns regarding the applicant's authority to file.

INJURY TO OTHER WATER RIGHTS: The backfile for water right 37-159B indicates that the East Fork Big Wood River was the original source of water. However, the currently authorized point of diversion is a groundwater source. Records in the backfile show that a transfer was approved to change the point of diversion to a groundwater source that is hydraulically connected to the East Fork Big Wood River. The partial decree reflects this change and includes a condition limiting groundwater diversion to times when water is available from, and in priority with, the East Fork Big Wood River.

Because the authorized groundwater source is hydraulically connected to the surface water system, the proposed rental is not expected to adversely affect river conditions. To remain consistent with the conditions of the partial decree, the rental should include a condition requiring that groundwater diversion occur only when water is available from the Big Wood River system and is in priority with the East Fork Big Wood River.

ENLARGEMENT OF USE: There are no irrigation water rights authorized for the proposed place of use. The water right authorizes irrigation at a rate of 0.02 cfs and a duty of 3.5 acre-feet per acre, which is the same rate and duty requested under the rental application. There are no concerns with enlargement.

LOCAL PUBLIC INTEREST: The proposed rental of water is in the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The proposed rental is consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The proposed POD is within the administrative area of IDWR's Southern Region and Water District No. 37. Comments regarding

the proposed rental were requested from the regional manager and Watermaster on June 29, 2026. No concerns were received.
