Good morning,

The department is nearing completion of evaluating Ruveon LLC's BRBA claims. During the review of BRBA claim 11-2144, a data entry error was found related to approved Amended Transfer 79037 dated September 3, 2015. In rare circumstances, the department's water rights database fails to overwrite a water right record as a result of a transfer. This results in a paperwork trail of an approved transfer and change in water right with the electronic water right file not showing the change. This error occurred for water rights 11-2144 and 11-7820 when the approved Amended Transfer 79037 was processed.

Because of the clerical error, the department's electronic file did not accurately describe water rights 11-2144 and 11-7820. This may have affected your office in completing BRBA claims for P4 Production LLC/Ruveon LLC. **BRBA claim for 11-7820 was not filed** and 11-2144 was filed based on the water right pre-transfer. The way the water right was filed is inaccurate to the true water right record today.

Both water rights have been corrected in our database. Attached are the water right reports and a copy of BRBA claim 11-2144. The purpose of this email is to notify you of this issue and provide an opportunity to file a BRBA claim for 11-7820. Because this was a clerical error by the department, **a late fee will not be assessed if filed before the Director's Report submission** (anticipated for December, 2026). In addition, an amended claim for 11-2144 is likely not needed. Lastly, the other BRBA claims covering the same industrial facility have completed review and will go through the Notice of Error period and submitted in the Director's Report.

Please reach out to me if you have any questions regarding this email.

Sincerely,

Christopher Holmes
