Comments: WR 95-17278 overlaps the permitted point of diversion (POD) and is owned by the permit holder according to Department records. Since the existing WR authorizes a different beneficial use there is no reason to limit use when combined with the existing WR.

2. Measurement Comments: No measurement is required for permits qualifying for an in-office examination according to the IDAPA Beneficial Use Examination Rules.

E. FLOW CALCULATIONS ___Additional Computation Sheets Attached

Measured Method: 2026 Bonner County/2025 NAIP Aerial Imagery and the permit holders Proof Statement indicated domestic use for one home was developed. The permit holder also confirmed domestic use for one home was developed in a phone conversation on August 7th, 2026, and email conversation on July 28th, 2026. According to Administrative Application Processing Memo #22 the standard diversion rate for a single domestic use is 0.04 cfs. I am recommending a 0.04 cfs diversion rate.

Administrative Application Processing Memo #22 Standard = 0.04 cfs
Permit allowed = 0.04 cfs
Total Recommendation = 0.04 cfs

Comments: N/A

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{I.R.}$ = (Acres Irrigated) x (Irrigation Requirement) = N/A

$V_{D.R.}$ = [Diversion Rate (cfs)] x (Days in Irrigation season) x 1.9835 = N/A

V = Smaller of $V_{I.R.}$ and $V_{D.R.}$ = N/A

2. Volume Calculations for Other Uses: The permit holder confirmed only in-house use was developed during a phone conversation on August 7th, 2026, and email conversation on July 28th, 2026. In addition, irrigation in the south of the property is already authourized under WR 95-17278 which overlaps the permitted POD. According to Administrative Application Processing Memo #22 the standard diversion volume for a single internal domestic use is 0.6 af. I am recommending a 0.6 af diversion volume.

Comments: N/A

G. PURPOSE OF USE

Irrigation ____Y __X__N # Stock ____N/A_____ Domestic # of Homes ___1 (Internal)___

Change in Purpose of Use? ____Y __X__N

Method of Determination: GIS, Idaho Tax Parcel Data, 2026 Bonner County/2025 NAIP Aerial Imagery, a phone conversation with the permit holder on August 7th, 2026, and the permit holders Proof Statement.

H. NARRATIVE/REMARKS/COMMENTS

This permit qualifies for an in-office licensing examination. The permit authourized internal and external domestic use for two homes. The permit holder confirmed on their Proof Statement, email conversation on July 28th, 2026, and phone conversation on August 7th, 2026, internal domestic use for one home was developed. 2026 Bonner County and 2025 NAIP Aerial Imagery confirmed the permit holders statement internal domestic use for one home was developed within the development period. WR 95-17278 overlaps the permitted point of diversion. However, since it authorizes a different beneficial (irrigation) and different portion of the property according to aerial imagery use there is no reason to limit use when combined with the existing WR. The standards set in Administrative Application Processing Memo #22 were utilized to make a diversion rate and volume recommendation. All conditions of permit approval have been met, and development of beneficial use was confirmed within authorization on the permit. Therefore, I am recommending a 0.04 cfs diversion rate and 0.6 af diversion volume.

Conditions F06, X59, X60, and 004 should remain on the license. Condition X04 should be changed to WB5 because only internal domestic use for one home was developed.

Have conditions of permit approval been met? __X__Yes ____No

I. RECOMMENDATIONS
