Hi McKenna Webster, my original POD has failed in this low water time. The additional POD will supply reliable water for around our home for yards, gardens, some pasture and fire protection if necessary. Our usage plan if we get the 2nd POD, will be to irrigate our hay and pasture areas as long as we can with the original POD. And use the new additional POD to irrigate grounds around our homesite covering a smaller area, that will be more reliable for the season.

Good afternoon,

I'm finishing up my final review of your application before a decision will be made. I just need a little bit more information from you to include with my review.

- What is the reason for adding this new point of diversion to water right 75-13953?
- How do you plan to use both points of diversion?

Thank you

Subject: Application for Transfer

Good afternoon,

I've been reviewing your Application for Transfer and found a few items that need attention. It looks like you are proposing to add a point of diversion, but you only described one point of diversion on page 5. Are you proposing to move the existing point of diversion?

Additionally, questions B2 on page 6 and C 1-3 on page 7 were left unanswered. I've attached a copy of your application for you. If you could answer those 4 questions, that would be helpful. Also, if you are proposing to add a point of diversion, please add the current POD on page 5: T24N R21E Sec 9 SWSW, Lemhi, North Fork Salmon River.

Please send me the corrected pages once complete.

Let me know if you have any questions.

Best Regards
