Christian,

I have attached all the information proving my well was up and running before August 28th, 2025. I've highlighted dates and other things of importance. We were able to use PumpCo's generator until we were able to go rent one from CAT. I've included that Rental Invoice. I've attached the Rocky Mountain Power contract that we had to put in because the original service we were using was inadequate for the new pump. This is why we used Pumpco's generator and rented a generator until Rocky Mountain Power was able to get the new updated service installed. There is also 8 affidavit's attached.

Thank you,

Tyrell Thomas

Water Right Permit

From Stewart, Christian <Christian.Stewart@idwr.idaho.gov>

Date Tue 6/30/2026 10:50 AM

To Jaime Thomas <thomasjaime@msn.com>

 1 attachment (303 KB)

20260630104847.pdf;

Tyrell,

I submitted my field report to the Water Resources Program Manager. Based on the evidence I collected in my report, he determined that the Department currently doesn't have enough evidence to conclude that you irrigated the area under the pivot prior to August 28th, 2025. He returned my report and told me he wants you to provide more evidence that you *irrigated with the pivot, from the well* before August 28th, 2025.

After the field examination, the Department obtained the power records for the 100hp pump. We were unable to find any power records indicating power had been used to pump in August 2025. The first power records appear in September. I was unaware of these power records during the field examination because I didn't have access to the power meter number. This is not to say you didn't irrigate from the well in August, but the power records we have don't provide enough evidence that you did. Perhaps there are more power records or an alternative explanation here.

The photos you sent me last fall of the constructed pump were from 9/18/2025. I also looked at imagery last fall and saw that the area under the pivot was irrigated in August. At that time, I didn't know that the pivot could have been irrigated by surface water, so I presumed the irrigation had to have been from groundwater. I now know that the irrigation I saw could have been from surface water. The pictures I have on their own do not prove irrigation from groundwater occurred before August 28th, 2025.

To proceed with licensing the permit, we need more evidence of irrigation before August 28th, 2025.

Examples of evidence include power records, receipts, photographs, and affidavits of those who could testify regarding the dates the well was first used for irrigation, or other documentary records. Pump tests on their own don't count as beneficial use since the water is not applied for irrigation.

I understand it may take some time to gather evidence. Please let me know if you have any questions.

Christian Stewart

AFFIDAVIT OF PERSONAL KNOWLEDGE

I, **Ned Burton**, Journeyman Electrician of PumpCo, being first duly sworn, declare under oath as follows:

1. I am over the age of eighteen and competent to make this affidavit. I have personal knowledge of the facts stated herein.
2. I am familiar with the irrigation well located at **[2595 West 2000 North Malad, ID 83252]**.
3. Based on my personal observations and knowledge, the irrigation well was operational and was actively being used to irrigate the property **before August 28, 2025**.
4. I personally observed the well operating and supplying water for irrigation prior to August 28, 2025, to the pivot across the street from the well and the wheel line in the field next to the well.
5. I make this affidavit voluntarily and for the purpose of documenting the condition and use of the irrigation well before August 28, 2025.

I declare under penalty of perjury that the foregoing is true and correct to the best of my personal knowledge and belief.

Executed on this 11th day of August, 2026, at 10:03 AM.

July 27, 2026

Ty Thomas,

I am writing in response to your request to provide evidence of completion date for the work Pumpco did for the project we referred to as 'Test Pump' 15-7409 in Malad, Idaho summer of 2025.

The work was done in Malad, Idaho and was completed before Aug 28th of 2025.

Pumpco had all the pump, electrical, VFD, and generator equipment installed and pumping by Aug 28th of 2025 as you will see by the work orders we have on file for this New Pump project.

I have attached all of Pumpco's actual Work Orders for the time and man-power we put into that job.

Thanks for being a Great Pumpco Customer!

Sincerely,

Janice Worton

**IRRIGATION PUMPING CONTRACT
(1000 KVA OR LESS)
between
ROCKY MOUNTAIN POWER
and
TYRELL THOMAS**

This Irrigation Pumping Contract ("Contract"), dated August 27, 2025, is between Rocky Mountain Power, an unincorporated division of PacifiCorp ("Company"), and **Tyrell Thomas** ("Customer"), for electric service for Customer's Irrigation Pumping operation at or near 2595 West 2000 North, Malad City, Idaho.

Company's filed tariffs (the "Electric Service Schedules" and the "Electric Service Regulations") and the rules of the Idaho Public Utilities Commission ("Commission"), as they may be amended from time to time, regulate this Contract and are incorporated in this Contract. In the event of any conflict between this Contract and the Electric Service Schedules or the Electric Service Regulations, such schedule and rules shall control. They are available for review at Customer's request.

1. **Delivery of Power.** Company will provide 277/480 volt, three-phase electric service to the Customer facilities.
2. **Contract Demand.** The demand in kVA that Customer requires to meet its load requirement and Company agrees to supply and have available for delivery to Customer, shall be 100 kVA (diversified, based on Customer's submitted load prior to the signing of this Contract)(the "Contract Demand").

After 36 months of service the Company may reduce Contract Demand to the maximum recorded and billed demand in the previous 36 months. The reduction in Contract Demand shall become effective thirty (30) days after the Company provides notice.

Within fifteen (15) days of Customer's written request for capacity above the Contract Demand, Company shall advise Customer in writing whether the additional power and energy is currently available, or if not currently available, initiate the processes to determine the costs to make it available.

3. **Extension Costs.** Company agrees to invest \$11,397.00 (the "Extension Allowance") to fund a portion of the cost of the improvements (the "Improvements") as per tariff. Customer agrees to pay Company the estimated construction costs in excess of the Extension Allowance ("Customer Advance"). Customer has paid for engineering, design, or other advance payment for Company's facilities in the amount of \$0.00, which amount is reflected in the balance due in the Customer selected option below. Customer trenching, conduit, vault and/or right-of-way ("TCVR"), when provided for Company lines and equipment, may also be subject to refund as calculated using Company standard costs. (**Customer must initial** selected option on the blank space at the beginning of the option and pay the balance due given in that option.)
