Leakage problem not yet resolved. That would be a most welcome change. No evidence of any vegetation management or leaks or seepage control at this point. Those problems continue to be problematic

No but the same issues remain on the creek condition which is that it has not been maintained nor have the leakage been addressed/

Hi Susan,

Have any circumstances in the creek changed since you placed the last delivery call for Water Right 95-0734 on January 29, 2026? In other words, are there any new circumstances that would cause the water to not sink through the Rathdrum Creek streambed bottom prior to reaching the

point of diversion for Water Right 95-0734? If so, please share the details. I will ask the Flood Control District 17 if it has conducted any vegetation management in this time frame.

Thank you,
Michelle

Again a call for water

DATE:____1/29/2026_____

To Whom It May Concern At IDWR and

Water Master for Twin Lakes Water District, Steve Neff

I am requesting water be supplied for Water Right 95-0734
most specifically for Livestock Water to the existing point of
diversion (POD).

Sincerely,

Gordon Sylte for Sylte Ranch LLC
