Emily,

I spoke with Jon about the transfer done in 2023, which moved the portion of 29-11813 to Section 19. Since the portion that was moved appeared to be irrigated within the last 5 years, I am going to move forward with processing this application. However, we still are in need of the bill of sale (or other document) that shows the sale of the 5 acres of water right to Bryon Goody.

Emily,

I was able to stop out at the location where those 5 acres are proposed to be split from. I've attached a photo of what I observed; there was a lot of dry native grasses and sagebrush--nothing that looked cultivated. I didn't see any signs of irrigation nor of an irrigation system either. Based on my observations and previous years imagery, we, unfortunately, are looking at forfeiture. Do you have any documentation or evidence showing that the area (the 5 acres proposed to be split) has been irrigated within the last 5 years?

That is the legal description for that area, yes. However, we are in need of a photo from NESW of section 19 T07S R36E, which is about 2 miles west of where that photo was taken and is where the 5 acres were split from the original right.

So the legal description of the property is 21 T07S R36. The picture is correct.

If a map is more helpful to visualize the area that we are in need of pictures from, please reference the attached map. We don't need pictures of the proposed water right location on the Goody property, but rather the current location of the water right from which 5 acres are proposed to be dried up.

Does this make sense? Let me know if you have any questions.

That map is correct. The right is being transferred from the little section in yellow to the west.

Could you provide some sort of documentation or pictures showing water use? It looks pretty dry on our imagery so it would be helpful to have some sort of evidence to include with the Application for Transfer.

Good afternoon,

I'm working through my final review of the Bryon Goody and Ruth Goody Revocable Trust Application for Transfer. I was looking at the section of the place of use for water right 29-11813 from which the 5 acres is being removed. I just need some information on how that piece of land is irrigated and how often.
