

Claim 11-7791 Use Evidence

2017 NAIP imagery from USGS shows series of evenly spaced, circular patterns arranged in rows across the eastern field. The circles appear uniform and distributed in a regular grid-like arrangement.

Claim 11-7791 Use Evidence

2021 NAIP imagery from USGS shows repeated spot-like patterns resemble zones that received slightly different amounts of water. The spot-like patterns are a semi-regular arrangement that consists of overhead sprinkler activity.
