Other Remarks:

POU was updated to reflect the authorized place of use for water right 11-7086 with the desire to establish a permissible place of use for water right 11-7121 within the same 200-acres area. Water right 11-7121 would limit irrigation of a specific 77 acres within the 200-acre place of use authorized by this right in a single irrigation season. Before changing the 77 acres to be irrigated within the 200-acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.

The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.

After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.

The period of use for the irrigation described in this approval may be extended to an ending date of 10/31 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water after 10/30 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.

If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
