Kyle,

I have received your amended claim and have updated your claim file.

Jacob Morris
Water Resources Agent
Idaho Department of Water Resources, Preston Field Office

Hey Jacob,

Here is the Amended claim signed. Let me know if you have any questions.

Thanks,

Kyle

Mr. Boehme,

Attached is the amended claim referenced in yesterday's phone conversation. Please review the claim form to ensure all information appears accurate. On page 4, you will find a map of the claim where I have marked the point of diversion (the well). Please indicate on the map both the overall place of use and the current area where the water is being used, labeling each as needed.

Once you have reviewed the claim and completed the map, please have all parties sign the last page and return all pages either by mail or email.

If you have any questions or need assistance, please reach out.

Jacob Morris

Kyle,

When it comes to the shares in question, if it is part of a canal or irrigation company, these shares are managed by the private company and not by IDWR. Shares provide access to the delivery system but do not constitute ownership of the water itself. The private company holds the actual water rights associated with the system.

Water rights, on the other hand, are governed by IDWR and represent the legal authorization to divert and use a specific amount of water from a natural source, such as a river or groundwater.

Regarding the sale of the shares you asked about: if the shares belong to a canal or irrigation company, you will need to contact that company directly, as they manage the distribution and administration of water within their system. The adjudication review conducted by IDWR evaluates the claimed water source and does not address interests related to canal or irrigation company share water.

I will have a total of 170 shares.

Thanks Jacob, I will get these documents signed and back to you as soon as possible. I do have one question on the Amended claim. Under other remarks there is a section that says, "If the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to section 42-222, Idaho Code, or approval of the department if a transfer is not required." I have 200 surface shares and one share is approximately good for one acre. I have about 180 acres that I am able to irrigate due to the corners on the pivot. I am planning on selling 30 surface shares so I will have a total of 177 shares. Will this cause any issues?

Thanks,
Kyle
