Dear claimant,

I have been reviewing your BRBA claim 11-7083 and upon review of your claim, I have a question regarding the section outlined in red. Aerial imagery does not show any irrigation infrastructure in this area. Could you please explain how this area is being irrigated, when water was last applied by the irrigation system, what the irrigation source is if it differs from the claimed source, and provide a description of the diversion works if they differ from the system already explained?

Scott,

Thank you for informing me about this year's method. For the years prior to the submission of the claim form, was the same conveyance method used, or was a different method utilized in the area in question?
