Dear Parties:

On July 27, 2026, I circulated draft approvals and asked the parties to identify any concerns with the drafts. Rohn Nelson responded with concerns about the places of use and overlap conditions on his proposed permits. I've spent the last two weeks working with Rohn to adjust the places of use and overlapping conditions to better reflect his plans. The adjustments did not affect the proposed points of diversion, priority dates, sources, or amounts.

Attached are revised draft approvals reflecting the place of use and overlap adjustments. I also updated the proof due date and the draft dates for the Natelson approvals so all of the drafts would have the same reference date. If these draft approvals address your issues of protest, please file a withdrawal of protest referencing the 9/28/26 draft approvals.

Just as a reminder: The Natelsons protested Application 74-16703. Rohn Nelson and IDFG protested Applications 74-16708 and 90405.

James
