Total Acres: 38

STOCKWATER same as IRRIGATIONConditions of Approval:

1. N05 The quantity of water under this right for stockwater use shall not exceed 13,000 gallons per day.
2. N08 The quantity of water decreed for this water right for stockwater use is not a determination of historical beneficial use.
3. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

Remarks:

IDAHO DEPARTMENT OF WATER RESOURCES

Water Right Report 67-4110

Comments:

1. mmount 8/10/2006 Priority

Comment: Claimant provided proof of the land being used for agriculture in 1915 however claimed 1950. Recommended 1950.

2. mmount 8/10/2006 pod

Comment: Mill Creek tag A0014037

3. lgraves 12/13/2006 Notice of Error

Comment: License 67-2051 with a 1910 priority date for 25 acres from an unnamed stream overlaps claimants p/u. Claimant did not file on this right. The licensing field report conducted in 1912 indicates the source as as a slough fed by irrigation ditches. The slough is north of claimants property. Rick Williams (claimants son) stated in a telecon 12/13/2006 that his father does not divert from the slough. Decree 67-124 also overlaps the claimed acres and was filed under right 67-11413 in the name of East Fork Ditch Company, which the claimant is a shareholder. Claimant also provided assessment information dated 1915 indicating irrigation of 76 acres in the S1/2SW S36. Obviously, the property was irrigated prior to the 1950 priority date listed on the claim. Because Mill Creek was included as a source in the Muir vs. Allison decree, a priority date of 5/10/1918 (day after decree was signed) can be recommended for this beneficial use claim based on the evidence provided.
