John Westra, Manager
Western Region

Dear John,

Due to the conflict between the Double Anchor Ranch (Riggs) and Charter Mountain Ranch (McCallum), both being at the head of Cold Springs Creek it was important that I monitor early water flow in the creek. On April 8th Charter Mountain was using their early water rights and there was no water going over the diversion. I took pictures of this and took them to Harley Riggs to see. The water level only decreased after that so there wasn't any water to be called for. I checked it one more time in late April and felt comfortable that my duties as Water Master on Cold Springs Creek were no longer needed.

Sincerely,

Richard Neal, WM, Cold Springs Creek, Elmore County
