Dear Sirs:

I am writing to request that you conduct a controlled fill of Nahas Reservoir, as has been done in some years in the past. We have the first winter storage right on Sinker Creek- but because of ice the water is all stored in Hulett Reservoir and then must be released prior to April 1 to fill Nahas Reservoir if it is not full. It is currently at a 20 year low of about 50%. I have made Frank Teig aware of the situation through Mike Ihli to Eric Cummins, farm manager. Watermaster Chad Nettleton has also been notified. Dan Nelson of IDWR has conducted the last 2 controlled fills and can give insight. I can be reached at 208-834-2533. Time is of the essence. Thank you for your help in this matter.

Sincerely,

Craig Baker, Mgr.
