RE:

WD 61D Little Canyon Creek Measurement/Lockable Order Follow-Up

On 1/29/2015, IDWR's Western Region Office issued a preliminary order requiring controllable diversion works and measuring devices for diversions on Little Canyon Creek. This order required plans detailing the controllable diversion works and measurement devices be submitted to the Watermaster for review by August 1, 2014. The order stated identification and inspection of diversions by the Watermaster shall occur on or about March 15, 2015. IDWR has assisted the watermasters with this inspection process for other district with recently issued measurement orders including Hornet Creek and Pine Creek in basin 67.

The following field work is requested:

- Accompany Watermaster Rich Wootan to each diversion.
- Identify the diversion owner and applicable water rights.
- GPS the diversion site.
- GPS and document type and operational status of measurement device as site.

Nick - Coordinate directly with Rich Wootan regarding meeting date, time and place.

Following the field work/site visits, prepare a summary of findings including a map.
