WATERMASTER'S REPORT

From: March 1, 2011 To: February 29, 2012

Water District No.: 130

Name of Watermaster: Cindy Yenter

Address: 1341 Fillmore St., Suite 200, Twin Falls, ID 83301

AFFIDAVIT OF WATERMASTER

STATE OF IDAHO }
COUNTY OF TWIN FALLS }

Cindy Yenter, being first duly sworn, deposes and says that she is Watermaster of Water District 130, having been lawfully appointed by Gary Spackman, Interim Director, Idaho Department of Water Resources, and that that volumes of water, as stated in this report and prorated by him to the water right holders of the district are correct.

C J Yenter

Watermaster District No. 130

Subscribed and sworn before me, this 1 day of March, 2012

(SEAL) DOUGLAS JONES NOTARY PUBLIC STATE OF IDAHO

I Douglas Jones

Notary Public

My Commission expires 8/8/2013

BOISE
~~Twin Falls~~, Idaho, _____, 20 ____

I HEREBY CERTIFY, that Cindy Yenter was lawfully appointed by me as Watermaster of Water District No. 130, and that the information contained in this report, as herein sworn to, is, to the best of my knowledge and belief, correct.

_____

Director, Department of Water Resources

By_____

Water District 130 Diversion Report for 2012
Compiled by: Cindy Yenter, Watermaster

Pursuant to Idaho Code 42-606, all Watermasters shall file an annual report to the Idaho Department of Water Resources, which includes the amount of water delivered by the Watermaster in the prior water year(s). The report of diversions is then used to determine annual assessment amounts to each water user.

Up to five years' diversion records may be averaged for each water user, and the average annual diversion used for assessment purposes. The following report averages diversion data for years ~~2005~~ 2006 through 2010. Data for 2011 are not included in this report, but will be included in the 2013 report.

The attached workbook is organized into reporting units and also includes non-reporting (small user) water users. Non-reporting water users are assessed a nominal administrative fee by Water District 130 but are not required to measure and report annual diversions at this time. Nonconsumptive water users are required to measure and report in Water District 130, and are assessed pursuant to Idaho Code 42-605A.

Each worksheet contains specific diversion identification information (WMIS number, Metal Tag Number, Diversion Name, Measurement Option), owner information and annual use data. All data are averaged over the period 2006 to 2010. Data qualifiers (QUAL) have been attached to some data. The Measurement Option and Data Qualifier keys appear below.

All data appearing within this report are proprietary and may be updated by Water District 130. Water District 130 and subdistricts conduct ongoing measurement of diversions and measuring device certifications. Calibration factors for flow meters and coefficients for power consumption estimates are recomputed every three years. As these numbers are updated, prior years' data may be adjusted.

Measurement Option key

1 - Totalizing flow meter on irrigation diversion
2 - Power Consumption Coefficient (PCC)
3 - Alternate method
4 - non use of well due to CRP
6 - non use of well, other reasons
7 - Time clock or Hour meter
8 - Totalizing flow meter on non-irrigation diversion
9 - Open channel or non-totalizing device

Data Qualifier key

Flow meter or timeclock qualifiers-
est - diversion volume estimated or water right volume used
NEW - new diversion, has not yet reported
NM - no reported data, diversions are occurring and may be estimated
ND - no measuring device installed, diversions are occuring and may be estimated
OW - data reported combined with another diversion
EM - reported data are erroneous, and could be higher or lower than actual diversions
Z - no diversions as confirmed by user, hydrographer or watermaster

PCC qualifiers-
1 Simple systems, one operating condition
2 Systems with multiple operating conditons and PCC for measured conditions varies by 10% or less
3 Systems with multiple operating conditions and PCC for measured conditions varies more than 10%.
4 Systems with multiple operating conditions, using low PCC (high flow) condition to estimate volume
5 Systems with multiple operating conditions, not all conditions known or measured
6 Known problem with reported kwh data
7 Measured PCC during flowmeter check
8 Complex system where flow meters or time clocks should be used
9 PCC not measured but may have been estimated
N PCC not measured
Z no power consumption as confirmed by user, hydrographer or watermaster

Total Avg AF Values	No. pods	Aggregate Share
2,788,434	54	$26,166

Total Average Diversions **3,419,978 acre-feet**
Total Reporting PODs **1839**

MINIMUM CHARGES
Water District 130 has adopted a minimum assessment charge of $25. That charge will be applied to individual billings only, where the total pro-rata diversion charge for an individual water user is less than $25. A $25 charge will also be made to all *non-reporting* water users (< 0.24 cfs or ≤ 5 ac).
