Water Year 2013 Report

The water year started out to look as though we were going to have a normal to below normal water year with 90 % snow pack. Then in late May we saw well below normal precipitation for the rest of the spring ending up with a near a alltime low water year. This resulted with a 40-50% of the normal stream flow for the season. This resulted with no carry over in the reseviior for the next season.

The total runoff for the Little Wood River Basin was 55,000 acre feet with 32,000 acre feet delivered to the farms and town lots. This is about 51% of the normal runoff (108.000 AF) and well below average water use.
