

WATERMASTER'S REPORT

From FEBRUARY 3RD, 20 15 To FEBRUARY 2ND, 20 16

Water District No. 130

Name of Watermaster CINDY YENTER

P.O. Address 650 ADDISON AVE. WEST SUITE 500, TWIN FALLS, ID

AFFIDAVIT OF WATERMASTER

STATE OF IDAHO)
COUNTY OF TWIN FALLS) ss.

RECEIVED
MAR 15 2016
DEPT OF WATER RESOURCES
SOUTHERN REGION

CINDY YENTER, being first duly sworn, deposes and says that he is Watermaster of Water District 130, having been lawfully appointed by GARY SPACKMAN, Director, Idaho Department of Water Resources, and that the volumes of water, as stated in this report and prorated by him to the water right holders of the district are correct.

Cindy J Yenter
(Deputy) Watermaster District No. 130

Subscribed and sworn to before me, this _____ day of _____, 20____.

Notary Public

(SEAL)

My Commission expires _____

Boise, Idaho, _____, 20____

I HEREBY CERTIFY, that _____ was lawfully appointed by me as Water Master of Water District No. _____, and that the information contained in this report, as herein sworn to, is, to the best of my knowledge and belief, correct.

Director, Department of Water Resources

By _____

Water District 130 Diversion Report for 2016

Compiled by: Cindy Yenter, Watermaster

Nathan Erickson, Assistant Water Master

Pursuant to Idaho Code 42-606, all Watermasters shall file an annual report to the Idaho Department of Water Resources, which includes the amount of water delivered by the Watermaster in the prior water year(s). The report of diversions is then used to determine annual assessment amounts to each water user.

Up to five years' diversion records may be averaged for each water user, and the average annual diversion used for assessment purposes. The following report averages diversion data for years 2010 through 2014. Data for 2015 are not included in this report, but will be included in the 2017 report.

The attached workbook is organized into reporting units and also includes non-reporting (small user) water users. Non-reporting water users are assessed a nominal administrative fee by Water District 130 but are not required to measure and report annual diversions at this time. Nonconsumptive water users are required to measure and report in Water District 130, and are assessed pursuant to Idaho Code 42-605A and the Water District 130 Adopted Resolutions.

Each worksheet contains specific diversion identification information (WMIS number, Metal Tag Number, Diversion Name, Measurement Option), owner information and annual use data. All data are averaged over the period 2010 to 2014. Data qualifiers (QUAL) have been attached to some data. The Measurement Option and Data Qualifier keys appear below.

All data appearing within this report are proprietary and may be updated by Water District 130. Water District 130 and subdistricts conduct ongoing measurement of diversions and measuring device certifications. Calibration factors for flow meters and coefficients for power consumption estimates are recomputed every three years. As these numbers are updated, prior years' data may be adjusted.

Measurement Option key

- 1 - Totalizing flow meter on irrigation diversion
- 2 - Power Consumption Coefficient (PCC)
- 3 - Alternate method
- 4 - non use of well due to CRP
- 6 - non use of well, other reasons
- 7 - Time clock or Hour meter
- 8 - Totalizing flow meter on non-irrigation diversion
- 9 - Open channel or non-totalizing device

Data Qualifier key

Flow meter or timeclock qualifiers-

est - diversion volume estimated or water right volume used

NEW - new diversion, has not yet reported

NM - no reported data, diversions are occurring and may be estimated

ND - no measuring device installed, diversions are occurring and may be estimated

OW - data reported combined with another diversion

EM - reported data are erroneous, and could be higher or lower than actual diversions

Z - no diversions as confirmed by user, hydrographer or watermaster

PCC qualifiers-

- 1 Simple systems, one operating condition
- 2 Systems with multiple operating conditions and PCC for measured conditions varies by 10% or less
- 3 Systems with multiple operating conditions and PCC for measured conditions varies more than 10%.
- 4 Systems with multiple operating conditions, using low PCC (high flow) condition to estimate volume
