Re: Goose Creek Lists

Dear Jeanette:

Enclosed are some printouts you might find helpful. The lists are labeled I, II or III and serve different functions. Here is an explanation of the lists.

List I

Includes **deliverable natural flow water rights arranged in priority order**. The deliverable water rights are those evidenced by decree or license on this list. The column labeled "stg" (stage) will include a "D" for decree or "L" for license. The only addition to this 1999 list is the last entry for license no. 78-2069.

The entries with an "S" indicate statutory claims (aka beneficial use claims) and cannot be delivered once water becomes short. Do not worry about the stage of the storage water filings in the list at this time.

We do not have the capability at this time to revise the list to include delivery ditch names by each water right. But you can easily reference those names in the copy of the decree I gave you the other day. Simply find the water right number to see the corresponding ditch name in the decree.

List I is the official list of deliverable water rights according to IDWR records.

List II

This 2001 list is a re-arranged version of List I. List II includes **the water right records in numerical instead of priority order**. The deliverable rights are highlighted in blue

Goose Creek Lists
July 3, 2001
Page 2

(decree and license) while the undeliverable ones are in red (statutory claims). This list can be useful to quickly find details for a given water right number.

List III

The last list covers the **current (June 20, 2001) adjudication claims filed for the use of Goose Creek water**. Claims can be based on previously recorded water rights ("basis" column shows decree, license or statutory claim) or on uses not previously recorded ("basis" is beneficial use). Claims do not necessarily have to make perfect sense at this time but will be reconciled with historical water uses in the adjudication recommendation process several years from now.

The **value of List III is its cross-reference use**. You can look for a water right number in the adjudication list to see who claims the water right at this time. The water right might be claimed in split portions such as 78-161A and 78-161B. Or the water right might be claimed under different numbers in the adjudication – see page 12 on List III for the Tassano scenario.

In this way you can get a good idea of who has what at least according to the most recent IDWR records. Obviously, IDWR records are only as good as water users make them by filing changes of ownership and so forth. A watermaster provides a valuable service to water users by reminding them to file ownership changes with IDWR.

List III cannot be considered an official delivery list at this time but can provide valuable information for your water district.

I hope this information proves helpful to you. I will be glad to visit with you in detail about any of the information if you have any questions. Also, I can stop by the next time I am in your area if you want to discuss the lists in person. Please call me at 208-334-2190 or send me an email if you prefer at slester@idwr.state.id.us for further assistance.

Sincerely,

Steve Lester
Water Rights Supervisor
