Re: Williams Creek Water Master Report - District 75-B

Williams Creek is a small stream that has approximately 14 users. Not all of the users are members of the "Shoup Decreed Water Right of 1886".

As Water Master of the Shoup Decree, I service only the members of that decree.

Williams Creek runs approximately 15000 inches of water in the spring run-off and decreases to less than 100 inches by mid-August as measured by Bob Foster of the Idaho Dept. of Water Resources and water master, Kevin Rice in August of 2002.

When the water begins to diminish, the water master divides the water to the users.

Kevin Rice
Water Master - District 75-B
