Mr. Smith:

The department has received a request to inventory the headgates and measuring devices on Tex Creek. The implication of the request was that a number of measuring devices have deteriorated badly and need replacing or repair.

I have asked Bob Foster of our Salmon office to co-ordinate the inventory process with you. Each headgate and measuring device should be inspected, photographed and located on a USGS map or air photo.

A Tex Creek "Book" will be developed from that information and orders for replacement or repair will be issued. If you have any question please give me a call.

Sincerely,
