

The 2000 irrigation season was a very dry year. Taylor Canal was turned off June 14th to accommodate users down stream.

The streams held up better than expected but were still below capacity. Most smaller ditches did not have enough water to accommodate irrigation.

Taylor Canal was turned back on July 18th and all water down stream lowered substantially. W.O.D. ditch went dry July 19th.

The total of all diversions for the season as determined from attached diversion Summary List was 1099.94 24-hr second feet delivered.

Paul:
Could you take a look at these items I found in the file for Water District 11-F?
If these are good enough for Skipta sign off on please let me know.

If I need to send a letter telling Utahmate we need to ~~go~~ regular from please let me know.

Thank
Darlene

Water District 11-1
Watermaster Proposed Budget

Because of a very dry year 2000 users of water were cut back on amount of water they were entitled to. The budget was payed out of past assessments.

The year 2001 each user will be assessed \$20.00 to make up the budget. The budget will be \$680.00. The watermaster is payed \$1500.00 for the year.
