RE: Middle Valley Ditch dam

Dear Gerald:

Over the past couple of years, the Middle Valley Ditch has been allowed to completely dam the Weiser River and divert the total flow down their system. They have constructed a black plastic check dam that restricts and stops stream flow. This obstruction interferes with the allocation of Weiser River water as set out in the Muir vs Allison Decree. During a short water year, this will cause problems with priority allocation. We would appreciate your follow up on this matter prior to the spring runoff season on the Weiser River and resolve the situation before a problem occurs.

Sincerely yours,

Jay Edwards
Secretary
