eld map

Jerry,

Under 65-3824 Eld Ranches has reservoir for 25 ac-ft of storage. It is sec 7-16N-4E  
JPeg map attached.

The outlet control on lower Jug is the responsibility of Cutler Umback  
Good to hear things are going OK, take care.

Hi John

Things are going reasonably well. I need to find out how many ac. ft. Joe Eld's Arnold resv. holds. That is the smaller of the two he has. It's located a little north and east of his house. He wants to trade some water with roseberry as his headgate is stuck. And hasn't been able to find a diver to access the problem. Also the headgate on little Jug has become almost impossible to open. Who needs to fix that ?

Thanks, Jerry
