Re: Updated Delivery Table for Porter Creek

Dear Hank:

Enclosed is some new information for your records. The new permit for Heffner, no. 65-22633, was approved since I provided you a delivery table earlier this year. The new Heffner permit will be known as #17 in the priority list.

Heffner's new approval only authorizes Porter Creek water to be diverted to several storage ponds during the non-irrigation season. I attached a memo to the copy of his permit. The memo tries to make sense of the Porter Creek points of diversion described by the permit. We can make better sense of it when we do our field tour later this month. We can also check the condition of all the usual diversions during our tour.

The enclosed table is dated May 1, 2002. It replaces the February 25, 2002, delivery table. Please disregard the February table and use the May table instead.

I will call you later this month to schedule our field visit. Please let me know if you think it would be a good idea to invite the advisory committee. It might be good for them to understand some of the diversion details for future reference.

Sincerely,

Steve Lester
Water Rights Supervisor
