Dear Jim,

This letter is to confirm our recent conversation regarding the delivery of irrigation water to the proposed site of River Ranch Subdivision by the Lake Irrigation District. As you know, Lake Irrigation District storage water rights specify that the water stored by the district be used for irrigation. It is our understanding that, when developed, the subdivision will have a water collecting system of sealed waterways and ponds and a pressurized irrigation to supply the units and open areas in the subdivision

The subdivision plans for water use were discussed by the LID Board of Directors at our monthly meeting on July 12, 2002. It was the board's decision at that time that the proposed water collection and pressure system satisfied the requirement for specified beneficial irrigation use.

Therefore, LID will be able to continue delivering water to the River Ranch site provided that the water is used for irrigation.

This decision is reflected in the minutes of the July 12th meeting of the LID Board of Directors.

If you have any questions please call me at 634 5566.

Yours truly;

Herald S. Nokes MD, Pres., LID Bd. of Directors.
