EMPLOYEE JL

RE: Office Visit -

a) Porter Cr -

#1 RAY Ewins mag. for Osl. Drained.

#2 JC Fay leasing from Olin-Dobson

→ called for water so won't have to farm on river pump.

if no river water: deliver #2, lock field valve at bluffs to prevent J.A. H2O going to J.A. land.

#1 WEIR w/ new pipeline, weir partly submerged so needs repair. For this year, can ✓ cfs & flowmeter on mainline at X J.A. Creek but weir setup must be repaired by next year.

I'll call for water in several places

Done!

→ Hank needs newest well/AS list for 65B just to be sure & who's who: when.... in case anyone questions his deliveries. I'll prepare for his pick up on Fri when he's in Boise again.

b) Sweet Lateral: things pretty well in hand, delivering proper # shares to all shareholders. Getting better coop from users. Some problems - being fixed - & excess water into lower part of lateral.
