May 22, 1995

Ms. Margaret L. Drake
Rt. 1, Box 58
Horseshoe Bend, Idaho 83629

Dr. Drake,

I enjoyed visiting with you today, and, as per our discussion, I have enclosed a copy of my spring newsletter as well as the Idaho Power Company Consent Form for you to fill out, sign and send back to me. The sooner I receive this form back in the mail, the sooner I can reconcile your accounts to more accurately reflect your actual water use during 1994. Just fill in the name the account is under, the service location (from your Idaho Power statement) and the account number associated with the pump. Please include names, service locations, and account numbers for all your diversions. In your case there are two pumps at two locations on the river, one on the west side and one on the east side. Please fill out the form, as well as fill in the authorization date. If you would allow me to use this form to account for your water use during the 1995 season, please fill in December 31, 1995 as the authorization date of the form.

I was told by me that your husband once told you he owned storage space in Deadwood Reservoir. I have checked the records of storage holders in Deadwood and found no record of any storage space under Drake. If you have a contract number or other documentation proving ownership of this space in Deadwood Reservoir, please forward it to me so I can correct the files.

Again, thank you for your call and I look forward to meeting with you in Horseshoe Bend. I will let you know the time and place of our meeting in the near future. In the meantime, please call me if you have additional questions.

Sincerely,

Mark Limbaugh, Watermaster

****SECOND NOTICE - EXCESS STORAGE WATER CHARGES DUE****

Dear Water User:

Enclosed, please a statement reflecting the amount you owe to the Water District for 1994 excess storage water use. The owners of storage water who leased this water to you through our Water Bank need to be paid for the use of this water. It is imperative that you clear your account with the Water Bank as soon as possible. Storage water rental is not available to you until this bill is paid, and with the possibility of another dry year in the future, rental of storage water would ensure you of an adequate water supply in those years.

If you have further questions, please give me a call at (208) 642-4465.

Sincerely,

Mark Limbaugh, Watermaster
