

NOTES:

- Hold 80% of required space in Cascade, 20% in Deadwood
- Runoff below reservoirs can exceed 12,000 c.f.s. (control to 12,000 c.f.s. is not always possible)
- Minimum winter space based on storing all reservoir inflows during maximum winter flood of record.

FLOOD CONTROL RULE CURVE
 Payette River nr Horseshoe Bend
 Control to 12,000 c.f.s.
 Based on data 1920-1994
