DEPARTMENT OF
WATER RESOURCES

Dear Jim,

I'm writing this letter as a follow up to your request earlier this summer to keep an eye on the well north & west of the Carl Jorgensen feed lot. I've checked the well out & found it to still be in operating condition. In fact, it has had new valves installed in the outlet pipe & the pump appears to be in good operating condition. I see no evidence of the well being in an abandoned condition, or the casing filled with concrete or bentonite. It appears to me that Mr. Jorgensen plans to use the well in the future.

If the weather permits I'll check the well again before snow flies.

Sincerely yours,
Craig Shub
