

Dept of Water Resource
Eastern Idaho Dist

Mrs Harold Jones

RECEIVED
05 1995

Department of Water Resources
Eastern District Office

Dear Harold,

We are making a request for assistance
by the Dept of Water Resource.

We have a discrepancy of measuring ^{water} due
to the physical structure of the main
head gate on Whiskey Creek

We need someone to determine the
velocity of water and also the exact grade
of the sides, at point of diversion.

The structure is about 14' x 14' with 2
pressure orifice located in front Well.

The advisory committee met today along
with water master Glenn Turner. We need
help as soon as possible.

Committee. Dan Mickelson Chairman
John Kung & Duane Mendenhall.

Sincerely
Dan Mickelson
427-6622.
