April 9, 1996

PHILIP E. BATT
GOVERNOR

KARL J. DREHER
DIRECTOR

Wayne Waddoups
Water Dist. 13-T Watermaster
1216 Bailey Ck. Circle
Soda Springs, ID 83276

Dear Mr. Waddoups:

Enclosed is a copy of the Department's Watermaster Handbook which will provide you with some reference and background information on Idaho Water Districts.

It is my understanding that you will be available to begin watermaster duties after May 24. I also understand that you will be available on a somewhat limited basis during the first two weeks and then will be available full time for the remainder of the summer. As we discussed, our office will try to arrange some time with you for training during the first two weeks after May 24. We look forward to working with you at that time.

The District should make some effort toward gathering pre-season pumping levels. This would involve measuring water levels in a sampling of wells throughout the area before pumping begins. This should probably be done in the latter half of April or first half of May. I will immediately begin looking for wells which can be measured for pre-season and post season monitoring. Please let me know if there is some day or half-day which you might be available during late April or early May. I at least plan to be near your area on May 1 or May 2.

Sincerely,

A handwritten signature in cursive script that reads "Tim Luke".
Tim Luke
