Dear Tim,

This evening I met with Dad Nilson. He showed me where the line from the Deep well had been severed to the Hansen well; however, it was already back filled + underground. He said he had pictures of the plumbing + would send them to you as soon as they were developed. Therefore, I had to take his word for it + unpadlocked the Deep well + turned on the valve. He doesn't want to flush the line like his father, Clyde, said but to irrigate under transfer 5545.

She crops his growing area as follows: NW 1/4 sect 20 potatoes with grain on corners, SW 1/4 sect 20 - all grain, + potatoes + grain on SE 1/4 sect 19. This section isn't totally planted as yet.

He didn't have time to show me

-- The Swain Christmas well but said  
he would when he had more time.  
If you need to talk to me about  
these matters, just give a call. I'll  
be around.

Sincerely,

Craig Shuler

Water District 13-T  
2000 File.
