Attention: Cindy
January 14-1997

I, Jay Hulet, request that the Idaho Department of Water Resource give me continued access to the control house of the Hulet reservoir when a Water Master is in control of the water for District 57D.

Reasons for this request:

- 1-I have two large streams of water that meet on my farm, and sometimes instant control is needed.
- 2-The Water Master has lived out of the area, and has other committments. At times she can only be reached by the answering machine, and it takes several days to get a change activated. By that time it may be to late to take care of the problem or emergency.

Jay Hulet
