Att: Steve Lester
Idaho Dept. Water Resource
2735 Airport Way
Boise, Idaho 83705-5082

Mr. Lester:

Since building my dam on Sinker Creek in 1976, I have honored the regulations from the Department that beginning April 1st, deliveries to the canal and creek was in force for deliveries of free flow or stored water to water users. The only exception to this regulation was the two or three springs when you authorized a control fill of the Nahas reservoir.

Do you have any records verifying *any* earlier dates? In the event there are identify them, and the reasoning for it.

I would appreciate hearing from you.

Sincerely:

Jay Mulet
