WATER RESOURCES
WESTERN REGION

Dear Dave:

I am very sorry to receive the information via your letter of March 25 and telephonic discussion with Cindy Hodges concerning Hulet's refusal to sign the proposed articles of Association for the Murphy Mutual Canal Water Users Association as agreed upon by all parties and his subsequent request for an additional article concerning canal maintenance. I had certainly hoped this matter had been resolved and looked forward to the current water season. As we discussed at great length at our February meeting (and I thought we agreed), the additional article proposed has no place in the water users association business. This association is set up only for the purpose of water delivery and I certainly would not agree to any unnecessary language that would expand that purpose.

I have held off filing water budget papers with the county clerk expecting signed documents for the lateral association at any time. As it appears this will not happen, I will file papers without further delay. Billing for the water district budget may be a little late as a result of the delay.

Sincerely,

Paul Nettleton
